1.1 Preamble

The Jaffna Campus which was the sixth Campus of the University of Sri Lanka established in 1974 became an independent and autonomous University with the name “University of Jaffna” with effect from January 01, 1979. The University of Jaffna is a full-fledged university with ten faculties and over thirteen thousand undergraduates.

Management and Commerce education started in the University of Jaffna, with the commencement of the Bachelor of Commerce Degree programme in 1977 under the Department of Economics of the Faculty of Arts. Subsequently, the Department of Commerce was established in 1983 and 1986, the scope of the department was expanded and renamed the Department of Commerce and Management Studies. In 1994, the Department of Commerce and Management Studies was segregated into two Departments: the Department of Management Studies and the Department of Commerce.

The Faculty of Management Studies and Commerce (FMSC) is one of the leading faculties in the University of Jaffna. It was established on 29th May 1999 at the main premises of the University of Jaffna as a fifth faculty of the University of Jaffna with two departments: Department of Commerce and Department of Management Studies which were initially under the Faculty of Arts. In 2009, the FMSC was restructured and accordingly, the Department of Commerce was dispersed and four new departments were established namely, Departments of Accounting, Financial Management, Human Resource Management and Marketing. The staff of the Department of Commerce and Department of Management Studies was reshuffled into the new departments. In 2012, the Department of Commerce was re-established. The first intake of students to the FMSC undergraduate program was 90 and the annual intake of students had increased over the years, reaching over 300 on average for the last three years. Now the faculty operates at the new premises—new grand and imposing buildings with adequate facilities— located at 10th Cross Lane, Kalasalai Road, Thirunelvely, Jaffna, Sri Lanka.

Vision, Mission and Values of the Faculty of Management Studies and Commerce

Vision

To be a leading centre of excellence in teaching, learning, research and scholarship in Management and Commerce

Mission

To transform the lives of students by developing their academic potential, creativity, employability, global insight and ethical awareness to outperform in a challenging business environment and to make a real difference in the world as an entrepreneur, as an investor, as a manager, and strategic planner

Values

Excellence: Promoting quality of being extremely good

Integrity: Maintaining the highest academic, professional and ethical standards and practice through trust, honesty and respect

Diffusion: Disseminating knowledge through teaching and learning, research and community engagement

Equity, Equality and Inclusion: Ensuring equity and equality and valuing difference and respect for all our students, staff and partners

Care: Recognising and serving the needs of students, staff and society

Transparency and Accountability: Ensuring freedom of thoughts and expression and accountability in all our activities

Passion: Fostering creativity, ingenuity, and innovation

1.2 Rationale for revising the curriculum

The FMSC, University of Jaffna is continuously committing to enhance management education through teaching, research and community engagement in Sri Lanka. The faculty offers a high-quality honours degree programme epitomised by the recent top grade “A” obtained—scrupulously assessed by the programme review committee appointed by the University Grant Commission—for maintaining the quality assurance on the Bachelor of Business Administration Honours Degree Programme. Management education is highly competitive and conferred with constant changes in the turbulent environment and thus the onerous responsibility of the faculty is to produce employable and socially sensible graduates. As a part of the process, the faculty periodically revisits its curriculum from time to time. In addition, taking into consideration of the recent stakeholders’ survey responses, the recommendation of the programme review committee, and changes in the labour market requirements, the faculty revises its curriculum. The revised curriculum is designed to deliver the expected capabilities of the graduates as described in the K-SAM model. FMSC strongly believes that the revision will have a favourable impact on all stakeholders and provide ample opportunities nationally and globally for our graduates.

1.3 Degrees offered by the Faculty of Management Studies and Commerce

The FMSC offers two major honours degree programmes:

- Bachelor of Business Administration Honours Degree
- Bachelor of Commerce Honours Degree

1.4 Scope of the Bachelor of Business Administration Honours Degree programme

Bachelor of Business Administration Honours is a four-year, full-time degree programme. The FMSC offers a Bachelor of Business Administration Honours Degree in five specialised areas:

- Bachelor of Business Administration Honours in Accounting
- Bachelor of Business Administration Honours in Financial Management
- Bachelor of Business Administration Honours in Human Resource Management
- Bachelor of Business Administration Honours in Marketing
- Bachelor of Business Administration Honours in Tourism and Hospitality Management

The exposition of the scope of the Bachelor of Business Administration Honours Degree programme is expressed in terms of **programme learning outcomes** and **graduate profile**. Programme learning outcomes refer to the knowledge, skills, abilities and mindset that the students are expected to demonstrate upon completion of an academic programme. The graduate profile describes the cognitive, personal, and interpersonal competencies that the graduates should have when they graduate.

a. Bachelor of Business Administration Honours Programme

(i) Programme Learning Outcomes (PLOs)

Upon the successful completion of the Bachelor of Business Administration Honours Programme, the graduates are expected to:

- | | |
|---------|--|
| PLO 01: | Demonstrate the advanced concept and theoretical knowledge in the core area of management. |
| PLO 02: | Analyse and critically evaluate arguments and issues within the management discipline. |
| PLO 03: | Develop effective communication skills to convey findings, meanings, and cases/scenarios of accounting both in oral and written presentations. |
| PLO 04: | Practice teamwork and leadership skills in working with peers for projects, programmes, and various accounting related assignments. |
| PLO 05: | Apply critical thinking, decision-making, and analytical problem-solving skills in a business environment to address potential business challenges and opportunities. |
| PLO 06: | Use managerial and entrepreneurial skills, not solely limited to the subject knowledge to search for employment opportunities, but also to be innovative in creating new business opportunities. |
| PLO 07: | Demonstrate information usage and management skills during the learning process, as well as in the working environment. |
| PLO 08: | Demonstrate the ability to engage responsibly in the economic, social, and cultural environments to advance individual, community, and global wellbeing. |
| PLO 09: | Demonstrate adaptability and flexibility to various changes in the practices of management and show the ability to absorb new trends. |

- PLO 10: Demonstrate good attitudes, values and professionalism in practising the knowledge gained from the degree programme and utilise them for the achievement of organisational excellence.
- PLO 11: Create a vision for life in searching for career opportunities and during the subsequent progression of career path.
- PLO 12: Choose self-updating and lifelong learning strategies in personal development with a vibrant set of goals.

(ii) Graduate profile

The desired profile of the graduate from the Bachelor of Business Administration Honours Programme encompasses knowledge, managerial skills, attitude and professionalism.

1.5 Structure of Bachelor of Business Administration Honours degree programme

The structure of the Bachelor of Business Administration Honours degree programmes is presented below.

University	: University of Jaffna, Sri Lanka
Faculty	: Faculty of Management Studies and Commerce
SLQF exit level	: 06
Name of the degree	: Bachelor of Business Administration Honours in Accounting : Bachelor of Business Administration Honours in Financial Management : Bachelor of Business Administration Honours in Human Resource Management : Bachelor of Business Administration Honours in Marketing : Bachelor of Business Administration Honours in Tourism and Hospitality Management
Abbreviation	: BBAHons (ACC) : BBAHons (Fin Mgt)

: BBAHons (Hum Rsc Mgt)
 : BBAHons (Mktg)
 : BBAHons (Tourism and Hospitality Management)
Duration : 04 Years
Number of Semesters : 08
Total credits :
 Level – 1 :34 credits
 Level – 2 : 34 credits

Level – 3

ACC : 32 credits
 Fin Mgt : 32 credits
 Hum Rse Mgt : 31 credits
 Mktg : 31 credits
 Tourism and Hospitality Management: 36 credits

Level – 4

ACC :30 credits
 Fin Mgt : 30 credits
 Hum Rse Mgt : 31 credits
 Mktg : 30 credits
 Tourism and Hospitality Management: 32 credits

Medium : English

The credit value of Compulsory, Elective, Enhancement and English course units for the Bachelor of Business Administration Honours Degree are shown below.

Levels	Semesters	Compulsory/ Core	Elective	Enhancement	English (Compulsory)	Total credits
Level I	Semester I	14	---	---	02	16
	Semester II	14	---	02*	02	18

	Mktg	14	--	--	--	14
	Tourism and Hospitality Management	14	--	--	--	14
Bachelor of Business Administration Honours in Accounting						130
Bachelor of Business Administration Honours in Financial Management						130
Bachelor of Business Administration Honours in Human Resource Management						130
Bachelor of Business Administration Honours in Marketing						129
Bachelor of Business Administration Honours in Tourism and Hospitality Management						136
* Not counted for OGPA calculation						

Note: One credit is considered equivalent to 50 notional learning hours for a taught course, laboratory studies course or field studies. In the case of work-based training, including time allocated for assessments, one credit is considered equivalent to a minimum of 100 notional hours (SLQF, 2015).

1.6 Course units and Course code

1.6.1 Types of Course units

The study programme consists of compulsory courses, core courses, elective courses, enhancement courses and English language courses.

Compulsory course unit

Compulsory course units should be studied by all students admitted to the Bachelor of Business Administration Honours degree programme. These courses provide the necessary knowledge, skills, attitudes, and mind-set and are offered at Level I and Level II.

Core course unit

Core course units are the compulsory units that are provided to students at Level III and Level IV. These course units are specialised area-specific course units.

Elective course unit

Elective course units provide broader knowledge and analytical skills in various subject areas.

Enhancement course unit

Enhancement course unit is an integral component of the degree programme designed to widen the knowledge, skills and attitudes of the students.

English

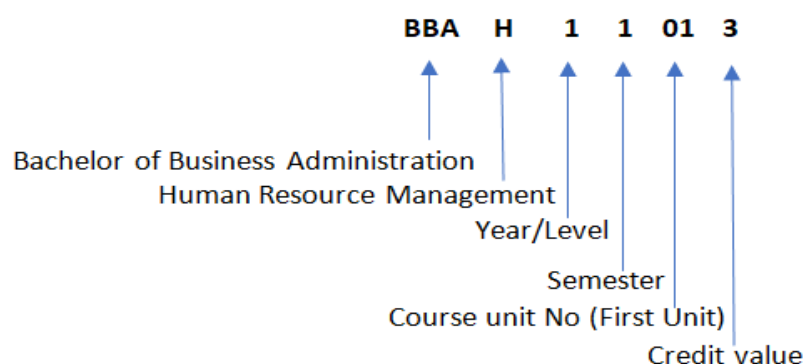

These courses are compulsory for all students provided at Level I and Level II.

1.6.2 Descriptor of the Course code

The identification of the course unit is described with a four-letter prefix, followed by a five-digit number.

- The first three-letter indicates the name of the degree programme
- The fourth letter indicates the department which offers the course
- The first digit number indicates the level of study (1-Year/level 1)
- The second digit number indicates the Semester (1-Semester I; 2-Semester II)
- The third and fourth digit numbers indicate the course unit number
- The last digit number indicates the Credit value of the course unit

Example: The descriptor of the course unit—**BBAH 11013** is

1.7 Evaluation procedures and examinations

1.7.1 Grading criteria

The grading system for evaluating each course unit is shown below.

Marks	Grade	Grade Points
80 and above	A ⁺	4.0
75 – 79	A	4.0
70 – 74	A ⁻	3.7
65 – 69	B ⁺	3.3
60 – 64	B	3.0

55 – 59	B ⁻	2.7
50 – 54	C ⁺	2.3
45 – 49	C	2.0
40 – 44	C ⁻	1.7
35 – 39	D ⁺	1.3
30 – 34	D	1.0
00 – 29	E	0.0

1.7.1.1 Calculating Grade Point Average (GPA)

The Grade Point Average (GPA) is a numerical representation of a student's overall academic achievement. The GPA is the proportion obtained by dividing the total number of grade points earned by the total number of credit hours in which a student receives a grade. The formula for GPA calculation is given below.

$$\text{GPA} = \frac{\sum_{i=1}^N (\text{Credit Hours}) \times (\text{Grade Point per Credit})}{\sum_{i=1}^N (\text{Credit Hours})}$$

Where i=Course number and N=the total number of courses considered

GPA calculation

Course Code	Grades Earned	Credits	Grade points per credit	Number of Grade point Values Earned=Credits × Grade points per Credit
BBAA 11013	A+	3	4.0	12.0
BBAM 11023	A-	3	3.7	11.1
BBAA 11033	B+	3	3.3	09.9
BBAF 11043	B	3	3.0	09.0
BBAF 11052	C	2	2.0	04.0
BBAD 11062	D	2	1.0	02.0
		16		48.0

$$\text{GPA} = \frac{\text{Total number of Grade Point Values Earned}}{\text{Total number of Credits}} = \frac{48}{16} = 3.00$$

Overall Grade Point Average (OGPA) is defined as the GPA of the student at the completion of the degree programme. The calculated OGPA will be rounded to the second decimal place.

1.7.2 Assessment of a course unit

The student's performance on a course unit will be assessed in terms of formative and summative assessments. The final evaluation is a combination of formative and summative assessments. The detailed information on the assessment of a course unit is provided on the relevant course specification.

1.7.2.1 Formative assessment

Formative assessment is an ongoing, systematic process of evaluating the students' performance on a course unit during the semester. The marks allocated for the formative assessment of each course unit are given in the relevant course specification.

- (i) It takes any forms such as quizzes, discussion, forums, take-home assignments, small projects, role play, drama, debates, presentation, etc. (see in its course specification)
- (ii) Obtaining at least 30% of marks (e.g. a minimum of 09 marks if the formative assessment constitutes 30 marks) in the formative assessment is mandatory to qualify for the semester-end examination of that particular course unit.
- (iii) If students failed to take the formative assessment on a medical ground/good cause, they may be given the opportunity to have make-up the assignment. The students should make a written request within five days from the date of the assignment taken place along with the evidence to the Head of the Department offering the particular course unit.
- (iv) The student who did not satisfy the minimum assessment requirement should retake the formative assessment in the next available batch as a repeat candidate.
- (v) Except above condition (IV), upgrading formative assessment is not permitted at all. When upgrading, the highest marks for relevant assignments shall be retained.
- (vi) Marks obtained for formative assessment will be carried forward to the semester in which students are repeating the course unit.

1.7.2.2 Summative assessment

The summative assessment represents the semester-end examination. Most course units require a final examination at the end of each semester. The duration of the examination can vary depending on the credit value of the course unit: in most cases, three hours for a three-credit course unit and two hours for a two-credit course unit. The details of the summative assessment including marks allocated for each course unit are provided in the course specification.

(i) Eligibility requirements for taking a semester-end examination

The students who are satisfying the below three conditions become eligible to take the semester-end examination.

Condition 1: Attendance

All students are required to attend all lectures, tutorials, and specialisation sessions. An attendance rate of 80% is required to be eligible to take the semester-end examination. In case of extenuating circumstances, students who are unable to meet the minimum attendance requirement due to medical reasons or any other good cause shall appeal to the Dean of the faculty of Management Studies and commerce through the relevant Head of the Department. The students who have not satisfied the minimum attendance requirement shall be considered as repeat candidates in the forthcoming examination.

Condition 2: Formative assessment requirement

No student shall be permitted to sit for the semester-end examination for any course unit unless he/she obtained at least 30% of marks in the formative assessment of that particular course unit.

Condition 3: Disciplinary grounds

The students may be punished for any committed offences by the University. In such circumstances, if the punishment entails the order of not allowing the student to the examination/entering the University, the student will not be allowed to take the semester-end examination.

The students who satisfied the requirement for taking the semester-end examination but did not apply for the semester-end examination shall be considered as **“incompletion of the semester” (ICS)**. The students should submit a request for obtaining approval for taking the semester-end examination in the subsequent semester from the Senate on the recommendation Faculty Board. Unless any good cause, the student will be treated as a repeat candidate.

A student who is absent for the semester-end examination of any course unit without authorization or valid reason shall be given **“AB”**. This would be considered as **“incompletion of the course unit”** and the student shall be treated as a repeat candidate.

A student, who is absent for the semester-end examination of any course unit on medical grounds or valid reason (such as bereavement, etc.), shall submit a student appeal with MC or supporting documents (good cause). The MC will be endorsed by the University medical officer (medical reasons). The appeal must be submitted to the Assistant Registrar / Senior Assistant Registrar of the FMSC within two weeks from the last date of the semester-end examination. The Senate approval will be sought on the Recommendation of the faculty Board and appeal board of the faculty

appointed by the Faculty. The symbol “MC” shall be given and the student will be treated as a “proper” candidate for the next available semester-end examination. There is no academic penalty.

(ii) Repeating and upgrading the semester-end examination

A student who is absent at the semester-end examination without a valid reason (“AB”) is eligible to obtain a maximum grade of “C+”. No semester-end examination conducted by the faculty will be repeated. A student who obtained less than grade “C+” may upgrade the course unit by repeating the course unit. In such circumstances, if the student earned less than the grade he/she obtained earlier, the better grade will be retained. Maximum consecutive three attempts (next available opportunities) will be given for repeating/upgrading the course units.

(iii) Title of the semester-end Examinations

The semester-end examinations conducted for the Degree of Bachelor of Business Administration Honours shall carry the following titles:

- First Examination in Bachelor of Business Administration Honours (Year) – First/Second Semester
- Second Examination in Bachelor of Business Administration Honours (Year) – First/Second Semester
- Third Examination in Bachelor of Business Administration Honours (Year) – First/Second Semester
- Fourth Examination in Bachelor of Business Administration Honours (Year) – First/Second Semester

(iv) Evaluation blueprint

The blueprint of the question paper for each course unit is described in the relevant course specification (see evaluation section). The primary aim of the blueprint is to bring clarity about the process of connecting questions to intended learning outcomes and the programme learning outcomes. Notably, these blueprints demonstrate how Bloom's taxonomy can be used to understand the quality of question papers and their effectiveness in assessing higher-order abilities. The structure of question papers, number of questions, choices given, time given for questions and examinations, etc., are included in the Course guide.

1.7.2.3 Dissertation

The Dissertation is to provide students with an opportunity to undertake an independent study under the guidance of an academic supervisor assigned by the Department. The students must submit a dissertation and face a viva-voce. The dissertation should be prepared adhering to the guidelines approved by the Faculty (available at the faculty website). The Dissertation will be assessed as specified below:

Interim presentation	10%
Dissertation (Report)	70%
Viva-voce	20%

1.7.2.4 Internship

The internship training is to provide students with an opportunity to gain hands-on experience of the practices of management in the real world of work and to apply the knowledge gained from classroom learning to a work setting. The Department will assign a Lecturer for overseeing matters relating to the internship and the organisation appoints a mentor. At the end of the internship, students should submit a report including the experience gained, requirements for additional skills and propose solutions to the management-related issues identified during the internship. The report should be prepared adhering to the guidelines approved by the Faculty (available at the faculty website). The students must attend all the components of the assessment. The internship will be assessed as specified below:

Logbook maintenance	15%
Mentor report	20%
Internship report	40%
Viva-voce	25%

1.7.3 Completion of a credit

Credit is treated as “completion” when a student satisfied the minimum requirement of formative assessments and sat at the semester-end examination. If the semester-end examination embodies more than one assessment component, the students must attend all components of the assessment.

1.8 Curriculum Layout and awarding criteria

The Bachelor of Business Administration Honours Degree Programme is four academic years. Each academic year is recognized as Level I, II, III and IV respectively. Each level of study consists of two semesters: Semester 1 and Semester 2. The duration of each semester is 15 weeks, sans the vacation and the period of examination.

Levels I and II are common to all the students who are admitted to the Bachelor of Business Administration Honours Degree Programme offered by the FMSC. Levels I and II curricula are intended to provide students with interdisciplinary knowledge that allows them to meet the capabilities as described in the K-SAM model. Level III and Level IV are separate for each discipline (Accounting, Financial Management, Human Resource Management, Marketing, Tourism and Hospitality Management) designed to meet the requirements of the honours degree programmes.

1.8.1 Level I

All students admitted to the Bachelor of Business Administration Honours Degree Programmes should follow Level I. Level I consists of two semesters with 34 credits. The first semester of Level I

consists of six-course units, of which four are compulsory course units with three credits each and two are compulsory course units with two credits each. The second semester of Level I consists of seven-course units, of which four are compulsory course units with three credits each, two are compulsory course units with two credits each and one is an enhancement course unit with two credits. The enhancement course unit will not be counted in calculating OGPA.

Semester I				
BBAH 11013	Principles of Management	3	Compulsory	16 credits
BBAM 11023	Sri Lankan Business Environment	3	Compulsory	
BBAA 11033	Financial Accounting - I	3	Compulsory	
BBAF 11043	Fundamentals of Finance	3	Compulsory	
BBAF 11052	Information Technology	2	Compulsory	
BBAD 11062	Business English I	2	Compulsory	
Semester II				
BBAF 12013	Business Mathematics and Statistics	3	Compulsory	18 credits
BBAH 12023	Business Economics	3	Compulsory	
BBAA 12033	Financial Accounting - II	3	Compulsory	
BBAM 12043	Marketing Management	3	Compulsory	
BBAT 12052	Introduction to Tourism and Hospitality Management	2	Compulsory	
BBAD 12062	Business English II	2	Compulsory	
BBAD 12072	Social Psychology	2*	Enhancement	
*Non counted for OGPA				
				Total credit counted for OGPA at level I is 32

1.8.2 Level II

All students admitted to the Bachelor of Business Administration Honours Degree Programmes should follow Level II as well. Level I consists of two semesters with 34 credits. The first semester of Level II consists of six-course units, of which five are compulsory course units with three credits each and one is a compulsory course unit with two credits. The second semester of Level II consists of six-course units, of which five are compulsory course units with three credits each and one is a compulsory course unit with two credits. Business English III and Business English IV will not be counted in calculating OGPA.

Semester I				
BBAT 21013	Events management	3	Compulsory	17credits
BBAH 21023	Managing Human Resources	3	Compulsory	
BBAA 21033	Management Accounting	3	Compulsory	
BBAF 21043	Computer-Based Information Management	3	Compulsory	
BBAM 21053	Business Legislation and Ethics	3	Compulsory	
BBAD 21062	Business English III	2*	Compulsory	
Semester II				
BBAF 22013	Financial Systems and Banking	3	Compulsory	17credits
BBAH 22023	Organisational Behaviour	3	Compulsory	
BBAA 22033	Audit and Taxation	3	Compulsory	
BBAM 22043	Public Service Management	3	Compulsory	

BBAH 22053	Entrepreneurship	3	Compulsory	
BBAD 22062	Business English IV	2*	Compulsory	
*Non counted for OGPA				
Total credit counted for OGPA at level II is 30				

1.8.3 Level III and Level IV

At Level III, the students will be invited to make an application for choosing the specialised area on their order of preference. The specialised area of studies leading to the honours degree is as follows:

- Bachelor of Business Administration Honours in Accounting
- Bachelor of Business Administration Honours in Financial Management
- Bachelor of Business Administration Honours in Human Resource Management
- Bachelor of Business Administration Honours in Marketing
- Bachelor of Business Administration Honours in Tourism and Hospitality Management

Criteria for Selecting Students for Areas of Specialisation

The following maximum percentage will be used to select students for a specialisation in Level III of the BBA Honours Degree programme:

Department of Financial Management	30%
Department of Accounting	28%
Department of Human Resource Management	20%
Department of Marketing	17%
Tourism and Hospitality Management	05%

The ceiling for the number of students allocated to each specialisation shall be determined by the Faculty Board, in each academic year based on the demand for the particular specialisation.

If the students' preference exceeded the maximum number, the student's performance of the relevant course units will be considered (see Table below for the relevant course units). The performance of the students will be assessed based on the total GPV.

Specialisation	Course code	Course units considered
Accounting	BBAA 11033	Financial Accounting I
	BBAA 12033	Financial Accounting II
	BBAA 21033	Management Accounting
Financial Management	BBAF 11043	Fundamentals of Finance
	BBAF 22013	Financial System and Banking
Human Resource Management	BBAH 21023	Managing Human Resources
	BBAH 22023	Organisational Behaviour
Marketing	BBAM 11023	Sri Lankan Business Environment
	BBAM 12043	Marketing Management
Tourism and Hospitality Management	BBAT 12052	Introduction to Tourism and Hospitality Management
	BBAT 21013	Events Management

Once a student has been permitted to read a particular honours degree programme at level III, semester I, the student must continue the same specialised area—honours degree—throughout the rest of the semesters (Level III-Semester II, Level IV- Semester I and II).

A. Bachelor of Business Administration Honours in Accounting

The students who have been admitted to the Bachelor of Business Administration Honours in Accounting must follow the course units described at Level III and Level IV.

I. Level III

Level III consists of two semesters with 32 credits. The first semester of Level III consists of four core course units with three credits each and three elective course units of which the students should select Two. Each elective course unit is a two-credit value. The second semester of Level III consists of four core course units with three credits each and three elective course units of which the students should select Two. Each elective course unit is a two-credit value.

Semester I				
BBAA 31013	Quantitative Methods for Business	3	Core	16 credits
BBAA 31023	Financial Reporting and Analysis	3	Core	
BBAA 31033	Business Taxation	3	Core	
BBAA 31043	Advanced Management Accounting	3	Core	
BBAA 31052	Entrepreneurial Accounting	2	Elective	
BBAA 31062	Investment Accounting	2	Elective	
BBAA 31072	Accounting Theory and Application	2	Elective	
Semester II				
BBAA 32013	Strategic Management	3	Core	16 credits
BBAA 32023	Digital Accounting	3	Core	
BBAA 32033	Research Methods in Accounting	3	Core	
BBAA 32043	Corporate Reporting	3	Core	
BBAA 32052	Business Ethics and Governance	2	Elective	
BBAA 32062	Forensic Accounting	2	Elective	
BBAA 32072	International Accounting	2	Elective	
Total credit counted for OGPA at level III is 32				

II. Level IV

Level IV consists of two semesters with 30 credits. The first semester of Level IV consists of four core course units with three credits each and three elective course units of which the students should select Two. Each elective course unit is a two-credit value. The second semester of Level IV consists of two course units, Dissertation in Accounting and Internship in Accounting, each with eight and six credits respectively.

Semester I				
BBAA 41013	Strategic Management Accounting	3	Core	16 credits
BBAA 41023	Advanced Audit and Assurance	3	Core	
BBAA 41033	Public Sector Accounting	3	Core	
BBAA 41043	Data Analytics for Accounting	3	Core	
BBAA 41052	Sustainability Accounting	2	Elective	
BBAA 41062	Contemporary Business Issues	2	Elective	
BBAA 41072	Project Management for Business	2	Elective	

Semester II				
BBAA 42018	Dissertation in Accounting	8	Core	14 credits
BBAA 42026	Internship in Accounting	6	Core	
Total credit counted for OGPA at level IV is 30				

III. Awarding Criteria: Bachelor of Business Administration Honours in Accounting

A student who has fulfilled the following requirements may be considered for an award of Bachelor of Business Administration Honours in Accounting:

1. Completion of 130 credits: Level I – 34 ; Level II – 34 ; Level III – 32 ; Level IV – 30

A student who has satisfied the above requirements for the award of the Bachelor of Business Administration Honours in Tourism and Hospitality Management degree within four academic years shall be awarded the degree of Bachelor of Business Administration Honours in Tourism and Hospitality Management with the class as specified below.

<u>Class</u>	<u>Overall GPA</u>
First Class	Overall GPA 3.7 and above
Second Class (Upper Division)	< 3.70 ≥3.30
Second Class (Lower Division)	< 3.30 ≥3.00

1.9 Fall-back option

a. A student who is unable to fulfil all the requirements for the award of Bachelor of Business Administration Honours degree may be considered for an award of Bachelor of Business Administration Degree if he satisfies

1. Completion of 90 credits except course units not counted for OGPA
2. Earn a minimum overall GPA of not less than 2.0 for the course units counted for the award (Above 1)
3. Obtained minimum “C” grade for Enhancement courses at levels I, II and III, and Business English I, II, III and IV
4. Not possessing less than a “C-” grade in more than three course units counted for the award
5. Fulfilled all the requirements mentioned above (1-4) within a maximum of 7 academic years from the academic year of the original enrolment in the University other than approved medical withdrawal

b. A student who is unable to fulfil all the requirements for the award of Bachelor of Business Administration degree may be considered for an award of Higher Diploma in Business Administration if he satisfies

1. Completion of 60 credits except course units not counted for OGPA.
2. Earn a minimum overall GPA of not less than 2.0 for the course units counted for the award
3. Obtained minimum "C" grade for Enhancement courses at Level I and Business English I, II, III and IV.
4. Not possessing less than "C-" grade in more than two course units counted for the award
5. Fulfilled all the requirements mentioned above (1-4) within a maximum of 7 academic years from the academic year of the original enrolment in the University other than approved medical withdrawal

The student should apply for such a fall-back qualification and the recommendation shall be made by the Faculty Board to the Senate of the University of Jaffna.

1.10 Determining the effective date of the degree

The effective date of Degree shall be the last date of the stipulated examination on which the Level IV, Second Semester examination concludes. For the students who repeat course units, the effective date of the Degree shall be the last date of the course unit repeated.

The effective date of such fall-back option qualification shall be the 1st day of the month after which the Senate of the University has approved the award.

1.11 Releasing of Results – Faculty Based Examination Board (Pre – Board)

- a) An Examination Board of the Faculty shall be constituted for each course unit to finalise the results of the course unit. The Dean of FMSC shall be Chairman of this Board. The Heads of the Departments of the Faculty, all Professors in the Faculty, and the First and Second Examiners of the course units shall be members of the Board.
- b) The Dean shall summon a meeting of the Examination Board whenever the Head of the Department is ready to release the final results of a course unit. The Grades obtained by the student for the particular course shall be displayed by the Head of the Department after releasing the result by the Pre-Examination Board.
- c) The marks scored by the students in the formative assessments and end-semester examination, overall marks scored by the students for a course unit and grades awarded to

the students by the Pre Examination Board shall be sent to Examination Branch by the Head of the Department.

1.12 Intermittent study

A student who is unable to continue the study programme due to medical or any acceptable reason for a period of time may request to hold his/her study programme for a period of not exceeding two years. The Senate approval will be sought on the recommendation of the faculty board.

1.13 Credit transfer

The credit transfer is the procedure of valuing the credit earned in another state University (in most cases, considered when the students transfer from another state university). The FMSC will appoint a committee to handle the individual request of credit transfer as and when required.

1.14 Academic Misconduct

The FMSC imposes a “zero tolerance” policy for any academic misconduct such as Plagiarism, Collusion, cheating, purchasing or commissioning, etc. The penalties for the academic misconduct may vary depending on its seriousness, including resubmission of work, zero marks, the termination of student registration and expulsion from the faculty/University.

Department of Accounting

DEPARTMENT OF ACCOUNTING

Introduction

The Department of Accounting (DOA) has strong teaching, learning, and research culture with university-industry cooperation and collaboration. DOA is committed to providing the best accounting educational experience for students to prepare them to operate effectively in a national and global environment. The DOA also aims to imbibe high ethics, traits, and value judgment in students to serve and maximise the social benefits of the community at large. The DOA has recorded a consistent improvement in its academic, research, and industry collaboration. It offers a creative and innovatively designed Bachelor of Business Administration (BBA) Honours in Accounting program which curricula are constantly updated to meet the changing industry's requirements and meet the needs of major stakeholders. The academics are active researchers and are engaged with industry in activities that build students' employability and create impact in communities.

Bachelor of Business Administration Honours in Accounting

(i) Programme Learning Outcomes (PLOs)

Upon the successful completion of the Bachelor of Business Administration Honours in Accounting, the graduates are expected to:

- PLO 01: Demonstrate advanced knowledge and understanding of the functional areas of accounting with an appropriate mastery of the related concepts, and methods.
- PLO 02: Analyse and critically evaluate arguments and issues within the accounting discipline.
- PLO 03: Develop effective communication skills to convey findings, meanings, and cases/scenarios of accounting both in oral and written presentations.
- PLO 04: Practice teamwork and leadership skills in working with peers for projects, programmes, and various accounting related assignments.
- PLO 05: Apply critical thinking, decision-making, and analytical problem-solving skills in a business environment to address potential business challenges and opportunities.
- PLO 06: Apply theoretical knowledge and use of entrepreneurial skills to create innovative business opportunities.
- PLO 07: Show the ability to integrate technical knowledge of accounting information management with other functional areas of the business environment.
- PLO 08: Demonstrate the ability to engage responsibly in the economic, social, and cultural environments to advance individual, community, and global wellbeing.
- PLO 09: Promote positive behaviours and aspire to make a difference in addressing accounting challenges, issues, and problems.

- PLO 10: Advance their aptitudes to identify, evaluate, and respond appropriately to professional, ethical, and regulatory issues in accounting.
- PLO 11: Create a vision for life while searching for career opportunities and during the progression of their career path.
- PLO 12: Choose self-updating and lifelong learning strategies in personal development with a vibrant set of goals.

(ii) Graduate profile

The aim of the Bachelor of Business Administration Honours in Accounting Degree Programme is to produce graduates with a broad knowledge in theory, practice and methodology of disciplines that enable them to bear responsibility in a professional environment.

Level I & II

Course Title	Financial Accounting I			
Course Code	BBAA11033			
Credit Value	3			
Status	Level 1/ Semester I/ Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	-	-	105
Aim				
The aim of this course unit is to provide knowledge in financial accounting and practices in order to prepare financial statements of an organisation.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Describe the conceptual framework of financial reporting – Identify the elements and components of financial statements – Explain the qualitative characteristics of financial information – Explain the underlying assumptions of financial reporting – Identify specific requirements in the preparation and presentation of financial statements – Identify the basic elements of investment account – Explain accounting entries for purchase and sale of investment – Prepare investment accounts using FIFO and weighted average method – Identify the purpose of accounting standards – Define the terms in the prescribed accounting standards – Explain the accounting treatments given in the standards – List the disclosure requirements of the accounting standards – Explain the purpose of a partnership – Prepare financial statements for a partnership – Prepare a set of financial statements for dissolution and conversion of partnerships into limited liability companies 				
Syllabus Content				
Conceptual framework for financial reporting: definition of conceptual framework, elements and components of financial statements, qualitative characteristics of financial information, underlying assumptions of financial reporting, recognition and derecognition, measurement; Investment accounts: purchase and sale of investments, cum-interest/cum-dividend, ex-interest/ex-dividend, investment accounts using FIFO and weighted average method; Sri Lanka accounting standards and Sri Lanka financial reporting standards: presentation of financial statement, inventory, property, plant and equipment, Financial Statements for a partnership: purpose of partnership, current account and capital account, financial statements for a partnership, dissolution and conversion of partnerships into limited liability companies.				
Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, presentations, individual assignments			
Evaluation	Formative assessment (In-course): 30% <ul style="list-style-type: none"> – At least three assessments for 30 Marks. 			

	<ul style="list-style-type: none"> – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study and debate. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration. – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 20 multiple choice questions for 20 Marks. ○ Part II Students are expected to answer all four questions that may include several parts. Total marks for this part is 80.

Course Title	Information Technology			
Course Code	BBAF 11052			
Credit Value	2			
Status	Level 1 / Semester 1 /Compulsory			
Notional hours	Theory	Practical	Field/Industrial visits	Independent learning hours
	20	30	-	50
Aim				
The aim of this course unit is to provide knowledge and skills required to apply information technology to business.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the terms data, information, Information Technology (IT), and Information and Communication Technology (ICT) – Discuss the issues, ethical use of IT and ergonomics in current business world – Assess the uses of information technology in business and real-life environments – Identify the physical components of computer system and its functions – Classify the logical components of computer system and its uses – Describe data communication and it's modes and elements – Explain basic networking principles and security measures to organise a local area network – Recognize current Internet and web technologies for a business environment – Operate on latest graphical environment of computer system – Choose software applications for documentation, reporting and analyses related to businesses. – Evaluate the usage of business applications in different cloud platforms 				
Syllabus Content				
<p>Introduction to Information Technology: definitions of data and information, introduction and basic elements of Information technology, uses of IT in business, health issues, ergonomics & the environment, cyber ethics, threats, safeguarding computers and communications systems; Computer system: physical components and logical components of computer system; Data communication and networks: data communication basic concepts, introduction to computer networks, components of computer networks, Open System Interconnection (OSI) model, data transmission media, IP addressing and configuration, introduction to network security; Internet and World Wide Web: internet and web technologies, cloud computing, social media, e-commerce and internet services; Applications for business: Working on graphical user interface (GUI) environment of computer system, Create and managing different types of files, organizing folders, typing in Unicode font for local language, working with applications for business documentations, reports and presentation, working with spreadsheet applications for business calculations and analyses; Cloud applications for business and organizational environment: working with cloud applications for documentation, spreadsheet analysis, presentation, forms, calendar and meeting and web site design, Create, manage and share files in cloud.</p>				
Teaching and Learning Methods/Activities	Lectures, virtual learning, practical, tutorials, group discussions, participatory learning activities, presentations, individual assignments, case studies and forum.			
Evaluation	Formative Assessment (In-course): 40% <ul style="list-style-type: none"> – At least four assessments for 40 Marks 			

	<ul style="list-style-type: none"> – The assessments could in the form of classroom assignment, Lab practical, take-home assignment, quizzes, presentations, and case studies. <p>Summative Assessment: 60%</p> <p>Written Examination</p> <ul style="list-style-type: none"> – End of course written examination is of two-hour duration – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 25 multiple choice questions for 25 marks. ○ Part II: Students are expected to answer three questions out of five questions that may include several parts. Total marks for this part is 75. ○ The total marks of written examination obtained out of 100 will be converted into 60%. <p>Practical Examination:</p> <ul style="list-style-type: none"> – Duration of the examination is two-hour duration – All questions should be answered. – The total marks of practical examination obtained out of 100 will be converted into 40%. <p>*Students should attend both examinations to complete the course unit</p>

Course Title	Business English I			
Course Code	BBAD 11062			
Credit Value	2			
Status	Level 1/ Semester I /Compulsory			
UTEL Benchmark	5			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	30	15	-	55
Aim				
The aim of the course is to provide opportunities for the learners to develop English Language skills with a focus on business contexts and environments.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Respond to gist and details in a range of simple and moderately complex texts related to business and administration. – Use contextual, structural, and morphological clues to deduce meaning of unfamiliar words and phrases. – Interact in Face to Face social conversations related mostly on personal information. – Demonstrate the ability to give and get information using a range of functional language. – Construct simple sentences incorporating appropriate mechanics and basic grammar such as parts of speech, subject-verb agreement and passivation. – Formulate appropriate questions and responses related to real life situations. – Identify the major and minor details of conversations, short lectures and news items. – Write personal notes to convey various messages. – Produce multiple drafts of different types of paragraphs describing people, places and objects related to business field. 				
Syllabus Content				
<p>Reading: Identifying the main idea of current or business related passages adopted from business magazines, newspapers and books, recognizing the meanings of new words, answering questions based on the passages. Grammar: Recognizing the forms, functions and uses of present, past and future tenses. Positive, negative and interrogative forms in all the tenses and their communicative functions, usage of prepositions and conjunctions, differentiating the active voice sentences and passive voice sentences and transformation of the sentences. Writing: Writing meaningful sentences and articles related to business field, developing the skill to write descriptions of people like, famous entrepreneurs, business leaders and managers and places like business organizations and writing personal notes to colleagues and relatives. Speaking: Self introduction and introducing others, asking for and giving business information, inviting and thanking. Listening: Answering questions while listening to audio or video records – business oriented speeches, interviews and lectures.</p>				
Teaching and Learning Methods/Activities	Lectures, Group discussion, Task-based language learning, student centered learning and Content and Language Integrated Learning (CLIL), self-learning activities using LMS & Computer Assisted Language Learning (CALL).			
Evaluation	<p>Formative Assessment (In-course) 30%</p> <ul style="list-style-type: none"> – Four assessments will be conducted to evaluate each skill. – The assessment could be in any forms such as classroom assignment, take-home assignment, oral presentation and online assessment – Formative assessment will be considered for 400 marks (100 marks 			

	<p>for the assessment of each skill)</p> <ul style="list-style-type: none"> – The marks obtained will be converted into 30 % to be added with the final marks. <p>Summative Assessment 70%</p> <ul style="list-style-type: none"> – Duration of the question paper is of two hours consisting questions based mostly on skills like reading and writing along with selected grammatical components. – The number of questions and the marks allocated to each question may vary depending on the type of questions. – All the questions should be answered and the marks allocated for the final assessment is 100. – Marks obtained will be converted into 70 % to be added with the final marks.

Course Title	Business Mathematics and Statistics			
Course Code	BBAF 12013			
Credit Value	3			
Status	Level 1 / Semester II /Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	-	-	105
Aim				
The aim of the course unit is to provide the basic understanding of mathematical and statistical concepts, knowledge and techniques required for the business students.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Describe the basic application of mathematical concepts in business – Solve the business problems using matrix operations – Explain the concept and rules of differentiation – Recognize the application of differentiation in solving business problems – Explain the concept and rules of integration – Apply integration for business decisions – Explain the basic concepts of business statistics – Compute measures of central tendency and dispersions – Describe the basic concept of correlation analysis – Explain the functions of linear regression – Use the correlation and regression analysis in business decision making – Perform time series analysis to solve the business problems – Explain the concept of probability – Use probability distributions in business decisions – Apply the hypothesis testing concept in business decision making 				
Syllabus Contents				
Business Mathematics Introduction of mathematical concepts to the business: basic concepts and skills of algebra, importance and usage of mathematical concepts to solve the business problems; Matrix and its application: types of matrices, matrix operations, determinant, inverse of the matrix and solving business problems using matrix applications; Differential calculus: rules of differentiation, maxima and minima functions; Application of differentiation: profit maximization and cost minimization; Integral calculus: rules of integration, definite and indefinite integrals; Applications of integration: marginal revenue, marginal cost and total change in revenue Business Statistics Introduction to statistics and its business application: functions, importance, scope and limitations of statistics in business, types of statistics, types of variables, levels of measurement, population and sample, application of statistics in the business world; Measures of central tendency and dispersions: Properties and measurement of central tendency and dispersions - mean, median, mode, range, percentile and quartile deviation, variance and standard deviation; Correlation analysis: introduction, types of correlation, coefficient of correlation, coefficient of determination; Regression analysis: introduction, assumptions of underlying linear regression, confidence and prediction intervals, regression equation, multiple regression model, individual regression coefficients; Application of correlation and regression analysis in business: measuring, predicting relationships and apply them in business decision making; Time series analysis: components- trend, cyclical, seasonal variations and				

<p>irregular variations, and forecasting; Probability: approaches to assigning probability, rules of computing probabilities, permutation and combination; Probability distributions: defining probability distributions, mean, variance and standard deviation of a probability distribution, types of probability distributions and business applications of the probability distributions; Hypothesis testing: procedures for testing hypothesis, one tailed and two tailed test of significance, errors in hypothesis testing, testing for a population mean with a known population standard deviation and unknown population standard deviation.</p>	
<p>Teaching and Learning Methods/Activities</p>	<p>Lectures, tutorials, group discussions, class discussions, participatory learning activities, virtual learning, presentations, individual assignments, textbook assignments, library research on topics or problems, open textbook study, problem solving or case study, applying statistical techniques to class data.</p>
<p>Evaluation</p>	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks. – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration. – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory and contains 20 multiple choice questions for 20 marks. ○ Part II: It contains two parts namely Part A and Part B. Part A consists of three questions in business mathematics and Part B consists of four questions in business statistics. These questions may include several parts. Students are expected to answer four questions by selecting at least one question from each part. Total marks for this part is 80.
<p>Recommended Readings:</p> <ul style="list-style-type: none"> • Brechner, R., & Bergeman, G. (2019). <i>Contemporary mathematics for business and Consumers</i> (9th ed.). Course Title	Computer Based Information Management			
Course Code	BBAF 21043			
Credit Value	3			
Status	Level 2 / Semester I /Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	30	30	-	90
Aim				
The aim of this course unit is to provide specialised knowledge and skills in the design and development of databases for business information systems and to develop competencies on database management systems and its applications for business.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the terms database, database management system – Describe current technology trends in the data management and business information systems – List the users in the database management system – Identify three-level ANSI-SPARC database architecture – Explain data models – Outline the relational database design concepts – Provide the fundamental elements of relational database management systems – Draw entity relationship diagrams for various business systems. – Illustrate the use of entity relationship diagrams in the business analysis report – State the importance of the normalization in database design – Discuss the update anomalies in database systems – Apply the functional dependency concept in normalization – Classify the characteristics of the three normal forms – Employ normalization process up to third normal forms in the design of a database – Write and execute queries – Develop complex queries with the use of window functions – Apply client software to manage and fill a relational database – Prepare reports and dashboards to provide access for users to business-critical information – Construct databases on server platforms 				
Syllabus Content				
<p>Database management and business information system: introduction to current trend in database and database management system(DBMS), business challenges of an enterprise, importance of the database approach, DBMS environment, different user groups of DBMS;</p> <p>Database system architecture: three-Level ANSI-SPARC architecture, database Schema, data independency;</p> <p>Database design: types of Data Models: Hierarchical Model, Network Model, Entity-Relationship Model, Relational Model, Object-Oriented Data Model and Data modelling techniques;</p> <p>Entity relationship model: elements of Entity Relationship Diagram, Identify the integrity constraints (business rules) hold for a given problem, draw an entity relationship diagram using conceptual schema;</p> <p>Normalization technique: introduction to Normalization, update anomalies, differences between Normalized and Unnormalized format of data representation, define first, second, third Normal forms. Process of Normalization for a business problem;</p> <p>Query</p>				

languages(SQL): define Structured Query Languages (SQL), Data Definition Languages (DDL), Data Manipulation Languages (DML), Data Control Languages (DCL), query languages for create, retrieve, insert, update, sort, join, delete, filtering data in a database, writing queries with join tables, sub queries, views, create forms and reports using SQL; Database for large and small business and development: data accessibility, data/database administration, data warehousing, data mining, security, data recovery, contemporary, the internet database environment, Business Intelligent system and modern IT infrastructure to database systems.	
Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, virtual learning, presentations, individual assignments, case studies, and forum.
Evaluation	<p>Formative Assessment (In-course): 40%</p> <ul style="list-style-type: none"> – At least four assessments for 40 Marks – The assessments could be in the form of classroom assignment, Lab practical, take-home assignment, quizzes, presentations, and case studies. <p>Summative Assessment: (60%)</p> <p>Written examination</p> <ul style="list-style-type: none"> – Duration of the question paper is of three hours – Students are expected to answer five questions out of seven questions that may include several parts. – Total marks of written Examination obtained out of 100 will be converted for 60%. <p>Practical Examination</p> <ul style="list-style-type: none"> – Duration of the question paper is two hours – All questions should be answered. – The total marks of practical examination obtained out of 100 will be converted for 40%. <p>*Students should attend both examinations to complete the course unit</p>

Course Title	Business English III			
Course Code	BBAD 21062			
Credit Value	2			
Status	Level 2 / Semester I / Compulsory			
UTEL Benchmark	6			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	30	15	-	55
Aim				
The aim of the course is to give general knowledge and understanding of the use of English in business situations and develop all the four skills of English Language.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> - Use various sub skills of reading to improve reading speed and comprehension of articles - Analyze unfamiliar words by understanding the structure of English Language - Listen to academic presentations and take notes while listening - Demonstrate understanding of clear standard speech on factual information, short talks announcements and news bulletins. - Use grammar structures and punctuation appropriately in different types of business correspondence - Provide appropriate oral responses to questions on personal, work or study matters - Develop presentation skills and public speaking skills on formal topics related to business and current affairs. - Extract literal and inferential information from graphs, charts, diagrams, flowcharts, and other illustrations. - Compose a range of written documents for business purposes accurately and concisely to include letters, memoranda, and electronic mails 				
Syllabus Content				
<p>Reading: Using critical reading skills to get information from academic and business related texts, developing vocabulary, analyzing and interpreting various texts. Answering binary choice and 'wh' questions based on the passages. Grammar: Identifying the communicative functions of various verb forms, usage of prepositions and conjunctions, constructing active and passive voice sentences, combining sentences using relative and 'if' conditional clauses to connect ideas in business writing; Writing: Identifying the difference between formal and informal letters, distinguishing different types of letters and writing letters such as inviting people, asking for permission, thanking and complaining. Analyzing the format of memoranda and e-mails and writing clear and concise memos and e-mails. Interpreting and presenting information in graphs, charts and tables describing statistical trends and products; Speaking: Communicating with each other using various communication strategies. Giving short speeches in formal and informal situations. Distinguishing the characteristics between good and bad presentations, developing presentation skills and doing presentations related to business topics using appropriate expressions; Listening: Using information from academic and business listening</p>				

passages to answer questions that include objective and subjective questions, make inferences, summarize and discuss.	
Teaching and Learning Methods/Activities	Lectures, Group discussion, Task-based language learning, student centered learning and Content and Language Integrated Learning (CLIL), self-learning activities using LMS & Computer Assisted Language Learning (CALL).
Evaluation	<p>Formative Assessment (In-course) 30%</p> <ul style="list-style-type: none"> – Four assessments will be conducted to evaluate each skill. – The assessment could be in any forms such as classroom assignment, take-home assignment, oral presentation and online assessment – Formative assessment will be considered for 400 marks (100 marks for the assessment of each skill) – The marks obtained will be converted into 30 % to be added with the final marks. <p>Summative Assessment 70%</p> <ul style="list-style-type: none"> – Duration of the question paper is of two hours consisting questions based mostly on skills like reading and writing along with selected grammatical components. – The number of questions and the marks allocated to each question may vary depending on the type of questions. – All the questions should be answered and the marks allocated for the final assessment is 100. – Marks obtained will be converted into 70 % to be added with the final marks.

Course Title	Financial System and Banking			
Course Code	BBAF 22013			
Credit Value	3			
Status	Level 2 / Semester II /Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	---	10	95
Aim				
The aim of this course unit is to provide students with an understanding of structure and functions of financial and banking systems.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the term financial system – Describe the functions of a financial system – Explain the structure of financial system of Sri Lanka – State the recent developments in the payment and settlement systems in Sri Lanka – Assess the importance of financial system stability for an economy – Discuss the contribution of Central Bank of Sri Lanka in maintaining financial system stability in Sri Lanka – Interpret the changes in the financial market indices – Describe the role of banking sector in financial system – Elucidate the structure of the statement of financial position of commercial banks – Explain the legal requirements on capital, reserve funds and liquid assets of banks – Analyse the legal nature of banker - customer relationship – Explain the objectives and regulatory measures of Basel III accord. – Calculate various types of interest rates – Assess bank products based on interest rates – Discuss the benefits of credit rating system in financial markets – Appraise the role of banks in combating money laundering 				
Syllabus Content				
Financial system: definition, role and functions of financial system in an economy; Structure of financial system of Sri Lanka: regulatory framework, financial institutions, financial markets, financial instruments and payment and settlement systems; Financial System Stability: meaning and importance of financial system stability, characteristics of a stable financial system, factors affecting the financial system stability, role of Central Bank of Sri Lanka in maintaining financial system stability; Financial market indices: calculation and interpretation; Banking: definition and importance of banking, functions and types of banks, commercial banking; Structure of statement of financial position of commercial banks: Loan portfolio and other assets, liabilities and capital; Banking legislation and regulations: licensing of banks, capital requirements, reserve funds, maintenance of liquid assets, banker-customer relationship, Basel III accord; Interest rate: types and calculations, assessment of bank products based on interest rates; Credit rating system: definition, purpose and types; Money laundering: definition, methods of money laundering and role of banks in combating money laundering.				
Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, virtual learning, presentations, individual assignments, take home			

	assignments, Library research on topics, use of recordings, open textbook study, forum, debate and field visit.
Evaluation	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study, debate, role play. <p>Summative Assessment:70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hours duration – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 20 multiple choice questions for 20 Marks ○ Part II: Students are expected to answer four questions out of six questions that may include several parts. Total marks for this part is 80.

Course Title	Organisational Behaviour			
Course Code	BBAH 22023			
Credit Value	3			
Status	Level 2 / Semester II /Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	---	10	95
Aim				
The aim of this course unit is to provide students with the knowledge and understanding of the factors influencing human behaviour within an organisational context and the opportunity of acquiring basic skills required for understanding, predicting and modifying human behaviour.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the key terms in organizational behaviour – Categorize the factors influencing of organizational behaviour – Relate values of employees with their behaviour – Contrast the three components of attitudes – Describe theories of learning and learning process – Outline the factors influencing perception – Describe the perception process and perceptual errors – Describe the concept of personality, its determinants, and different types of personality – State the methods of assessment of personality and the problems associated with the assessment – Identify the causes and consequences of political behavior at work – Explain the types of conflict, its sources and consequences – Propose the conflict handling strategies – Describe the levels and types organizational culture – Analyse the functions of organizational culture – Identify the factors triggering the organisational change and development 				
Syllabus Content				
<p>Introduction to organisational behaviour (OB): definition, historical background of OB, levels of analysis of OB, challenges and opportunities for OB; Learning: definition, learning theories; Values and attitudes: definition, types of values, three components of attitudes, relationship between values, attitudes and emotion; work related attitudes: job satisfaction, commitment, perceived organisational support, engagement, organisational citizenship behaviour; Perception: definition, perceptual process, factors affecting perception, perceptual errors; Personality: definition, objectives of assessment of personality, determinants of personality, big-five traits and other personality characteristics influencing behaviour, methods of assessing personality, personality and individual outcomes; Organisational politics: nature of organisational politics, causes and consequences of organisational politics; Managing Conflict: meaning of organisational conflict, sources of conflict, positive and negative outcomes of conflict, conflict management; Organisational culture: definition, levels of organisation culture, types of organisational culture, functions of organisational culture, transforming organisational culture, spiritual organisation; Organizational change and development: meaning, sources of change, types of change, change management models, organizational development.</p>				

Teaching and Learning Methods/Activities	Lectures, tutorials, discussions, online learning activities, presentations, individual assignments, case studies, forum, field visit and debate.
Evaluation	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study, inquiry based assessment, debate, role play. <p>Summative Assessment:70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 20 multiple choice questions for 20 marks ○ Part II: Students are expected to answer four questions out of seven questions that may include several parts. Total marks for this part is 80.

Course Title	Auditing and Taxation			
Course Code	BBAA 22033			
Credit Value	3			
Status	Level 2 / Semester II/ Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	-	-	105
Aim				
The aim of this course unit is to provide the knowledge on basic concepts and techniques of auditing of the organisation and taxation of the resident individual.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Identify the nature and purpose of auditing within the regulatory auditing environment – Describe the scope of internal control and internal audit and the limitations of the internal audit function – Identify the activities connected with setting the audit planning and sampling – Define audit evidence – Explain the sufficiency and appropriateness of audit evidence – List different audit procedures used to gather audit evidence – State the elements of an audit report – Explain the audit reporting requirements of listed companies – Identify the principles of taxation in the Sri Lankan context. – Explain direct and Indirect taxes – Explain the sources of income of a resident individual – Assess the assessable income from different sources of a resident individual – Assess the total assessable income, taxable income of a resident individual – Assess the gross income tax liability and balance taxable liability of a resident individual 				
Syllabus Content				
Auditing Demand for audit and assurance services: assurance services, nature of auditing, distinction between auditing and accounting, objectives of auditing; detection and prevention of frauds and errors; Internal control: internal control, test of controls, internal audit; Audit evidence: nature of evidence, audit evidence decisions, persuasiveness of evidence, types of audit evidence, analytical procedures; Audit planning and documentation: accepting audit engagement and performing initial audit planning, purposes of audit documentation, content and organisation of audit files; Audit sampling: the role of audit sampling, statistical vs. non-statistical sampling and probabilistic vs. non-probabilistic sample selection, application of non-statistical audit sampling for tests of controls and substantive tests of transactions; Audit reporting: the audit report, standard unmodified audit report, audit reporting requirements of listed companies; materiality, examples of audit reports.				
Taxation Introduction of taxation in Sri Lanka: functions and principles of taxation; direct and indirect taxes, current tax system; Total assessable income of an individual: chargeability of income tax; assessable income from employment, business, investment and any other source; Income tax liability of a resident individual: calculation of total assessable income, basic reliefs and qualifying payments, taxable income, gross income tax payable, balance tax payable amount				

Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, presentations, individual assignments
Evaluation	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks. – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study and debate. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration. – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I is compulsory. It contains 20 multiple choice questions for 20 Marks. ○ Part II Students are expected to answer all four questions that may include several parts. Total marks for this part is 80.

Course Title	Public Service Management			
Course Code	BBAM 22043			
Credit Value	03			
Status	Level 2 / Semester II / Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	---	10	95
Aim				
The aim of the course unit is to provide the knowledge about public service management practices adopted by public sector organizations in Sri Lanka.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Describe the concept of service, public service and public service management – Recognize the significance of public service management – Differentiate the features of the Sri Lankan public sector organisations – Explain the challenges facing public sector organisations in providing services – Demonstrate the history and prospects for public sector reforms of Sri Lanka – Explain the evolution of Public Service Marketing – Examine the cultural profile of Sri Lankan customers – Discuss the role of customer satisfaction in public service sectors – Evaluate customer expectations and experiences regarding the public services – Appraise customer care management in public sector organisation – Demonstrate public service strategy and competitiveness – Explain the good ethical way of behaviour in the public sector organization – Analyse the impact of technological development on public sector administration – State the meaning of public service marketing and its significant contribution to the service economy – Classify various types of public services – Apply the SERVQUAL model service delivering process of the public sector organisation in Sri Lanka 				
Syllabus Content				
<p>Introduction to public service management: define the terms of public service and public service management, features and importance of public service management; Public service management in Sri Lanka: functions and significance of the public sector, public sector reforms with historical perspectives, challenge in public sector management in Sri Lanka; Customers: the focus of public service management: customers and their needs, consumer behavior and a consumer decision model, unique aspects of service purchases, a cultural profile of Sri Lankan customers; Public service strategy and competitiveness: service value, strategy, formulating a competitive service strategy, ethical challenges in public service management, ethics problem in private and public sectors, challenges for public service employees and managers, philosophical theories of ethics; Technology and its impact on public services management: process technology and information technology, technology in public services, why public sector invest in technology, technology as a competitive edge, application areas of technology in public services; Public service marketing: the evolution, meaning of public service marketing and classifications of public service, importance of service sectors, emergence of service economy, general concept of service productivity system, service encounters; Service quality and customer or client satisfaction in public sector organization:</p>				

SERVQUAL model, customer loyalty, customer experience management, customer expectation management, customer retention, customer perceive value.	
Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, online learning activities, presentations, individual assignments, case studies, forum, field visit and debate.
Evaluation	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study, debate, role play. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 20 multiple choice questions for 20 marks ○ Part II: Students are expected to answer four questions out of seven questions that may include several parts. Total marks for this part is 80 marks.

Course Title	Entrepreneurship			
Course Code	BBAH 22053			
Credit Value	3			
Status	Level 2 / Semester II /Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	---	10	95
Aim				
The aim of the course unit is to provide students with the knowledge, skills and motivation for organizing and carrying out entrepreneurial activities and to ensure entrepreneurial success in a variety of settings.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the terms small business and entrepreneurship – Explain the importance of small business and entrepreneurship to economic development – Elaborate the nature of the entrepreneurship – List out the characteristics of successful entrepreneurs – Examine the influential factors of entrepreneurial intention – Identify the challenges in entrepreneurship – Evaluate the nature of an existing business – Generate innovative business ideas – Apply the venture selection process to identify successful business idea – Organise the structure of the new ventures – Analyse the financial needs for the new ventures – Prepare the business plan – Assess the feasibility of the business plan – Suggest the entrepreneurial strategies to sustain in the market – Discuss the contemporary issues in entrepreneurship 				
Syllabus Content				
Introduction to entrepreneurship: definition of the concept of small business and entrepreneurship, motivation for owning a business, defining and measuring the small and medium enterprises; Evolution of entrepreneurship: approaches to entrepreneurship, entrepreneurial strategy, nature of entrepreneurship; Entrepreneurial mind-set: entrepreneurship in practice, the dark side of entrepreneurship, entrepreneur's confrontation with risk, stress and the entrepreneur and the entrepreneurial ego; Creativity and business idea: developing start up ideas, innovative thinking to generate business ideas, new venture selection process, managing manufacturing and service operations in entrepreneurship; Entrepreneurial intention: types of entrepreneurship, entrepreneurial qualities; Challenges in entrepreneurship: ethical and social responsibility challenges for entrepreneurs, emerging issues in entrepreneurship; Business plan: overview of the business plan, marketing plan, production plan, organization and management plan, financial plan, preparing business plan, criteria for evaluation of business plan, evaluation process; Contemporary issues in entrepreneurship.				
Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, online learning activities, presentations, individual assignments, case studies, forum, etc.			
Evaluation	Formative assessment (In-course): 30% <ul style="list-style-type: none"> – At least three assessments for 30 Marks 			

	<ul style="list-style-type: none"> – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study, debate, role play. <p>Summative Assessment:70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 20 multiple choice questions for 20 marks ○ Part II: Students are expected to answer the first question (Case study) and other three questions out of seven questions that may include several parts. The total marks for this part is 80 marks.

Course Title	Business English IV			
Course Code	BBAD 22062			
Credit Value	2			
Status	Level 2 / Semester II /Compulsory			
UTEL Benchmark	6			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	30	15	-	55
Aim				
The aim of the course is to give general knowledge and understanding of the use of English in business situations and develop all the four skills of English Language.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> - Comprehend, organize, and retain written information related to business and administration. - Increase vocabulary through the study of word parts, use of context clues, and practice with a dictionary. - Extract key ideas and details of business texts, while listening - Demonstrate an understanding of more complex grammatical structures in speaking and writing that includes relative pronouns and reported speech - Demonstrate in different roles in a variety of simulated business contexts including preparing for and participating in meetings - Prepare PowerPoint presentations that include text, graphics, animation, and transitions. - Compose a range of business documents to include notices, agendas, minutes and reports - Formulate business letters with an emphasis on clarity and brevity. 				
Syllabus Content				
<p>Reading: Identifying main points and supporting details, determining audience and purpose, summarizing and responding to written Business English texts. Expanding academic and business vocabulary. Grammar: Using grammatical structures and punctuation appropriately in different types of business correspondence; Constructing active and passive voice sentences, combining sentences using relative and 'if' conditional clauses to connect ideas in business writing. Using indirect speech to report.</p> <p>Writing: Transferring information from charts, tables and graphs and write meaningful passages. Writing memos, e-mails and formal letters pertaining to business field. Writing reports and minutes of meetings using the appropriate format. Speaking: Communicating with each other using various communication strategies. Giving short speeches in formal and informal situations. Distinguishing the characteristics between good and bad presentations, developing presentation skills and doing presentations related to business topics using appropriate expressions. Listening: Answering questions giving details of lectures, announcements, conversations and news bulletins while listening to native and nonnative speakers</p>				

Teaching and Learning Methods/Activities	Lectures, Group discussion, Task-based language learning, student centered learning and Content and Language Integrated Learning (CLIL), self-learning activities using LMS & Computer Assisted Language Learning (CALL).

Level III & IV

Bachelor of Business Administration
Honours in Accounting

Department of Accounting

Course Title	Quantitative Methods for Business			
Course Code	BBAA 31013			
Credit Value	3			
Status	Level 3/ Semester I /Core			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	-	-	105
Aim				
The aim of this course unit is to provide the knowledge in using quantitative methods and techniques for effective decisions-making; model formulation and applications that are used in solving business decision problems.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the role of quantitative methods in business decision making – Explain basic concepts of optimization, modelling and linear program modeling – Formulate linear programs – Solve the linear program model by using graphical and simplex method – Formulate transportation and assignment problems as mathematical programming model – Solve Transportation Models and Assignment Model – Construct an active network diagram – Calculate earliest and latest start and finishing times for activities – Determine the critical path(s) through a network – Explain mathematical concepts of analytical queuing models: arrival distribution, service-time distribution, queue discipline, and queuing behavior – Explain the three parts of a queuing system: the calling population, the queue itself, and the service facility – Apply main formulas of single-server queuing model (such as stationary probabilities, average waiting and system time, expected number of customers in the que, etc.) – Identify activities connected with the inventory control – Calculate inventory control levels and EOQ – Explain how to adopt a systematic approach to decision-making under uncertainty. – Identify the sources of uncertainty behind strategic decisions – Illustrate how to integrate all steps by optimization and simulations to reduce the uncertainty 				
Syllabus Content				
<p>Linear programming (LP): model formulation, graphical solution for two-variable problems, special cases in LP, the simplex method, sensitivity analysis; Transportation, transshipment and assignment problems: initial solution for transportation problem, optimal solution for the transportation problem, special cases in transportation problem, assignment problems with the hungarian method; Network analysis: PERT network, activity-on-node technique, activity completion time and variance estimation, beta probability distribution, critical path, probability of project completion, CPM, project crashing; Queuing models: characteristics of a queuing system, total expected cost and service level, Kendall notation, queuing models; Inventory control: inventory value, inventory control methods, inventory control system; Decision analysis: decision-making under certainty, decision-making under risk, decision-making under uncertainty, decision making techniques, decision tables, decision tress.</p>				

Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, presentations, individual assignments
Evaluation	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study, and debate. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 20 multiple choice questions for 20 Marks ○ Part II: Students are expected to answer four questions out of five questions that may include several parts. Total marks for this part is 80.

Course Title	Dissertation in Accounting
Course Code	BBAA 42018
Credit Value	8
Status	Level 4 / Semester 2 /Core
Notional hours	800
Aim	
The aim of this course is to provide students with a structure that enables them to conduct independent research on a topic agreed with their supervisor, provides knowledge to develop the skills required to conduct independent research on an accounting related subject.	
Intended Learning Outcomes	
<ul style="list-style-type: none"> – Apply knowledge and skills, with a high level of personal autonomy to execute a substantial research. – Synthesise research findings to communicate theoretical propositions, methodologies, results and conclusions to professional audiences. – Apply the principles of academic integrity and ethical conduct in research. 	
Evaluation	<p>The students should submit a dissertation and face a viva-voce. The dissertation should be prepared adhering to the guidelines approved by the Faculty.</p> <ul style="list-style-type: none"> • Interim presentation -10 % • Dissertation-70 % • Viva-voce -20 %

Course Title	Internship in Accounting
Course Code	BBAA 42026
Credit Value	6
Status	Level 4 / Semester II /Core
Notional hours	600
Aim	
The aim of this course is to provide the students to get first-hand exposure of working in the world. It also allows students to harness the skill, knowledge and theoretical practice they learnt in University.	
Intended Learning Outcomes	
<ul style="list-style-type: none"> – Demonstrate the application of knowledge and skill sets acquired from the course – Demonstrate appreciation and respect for diverse groups of professionals by engaging harmoniously with different organisation stakeholders – Relate fundamental technological concepts and industrial practices – Display professional ethics by displaying positive disposition during internship – Demonstrate interpersonal skills – Display professional ethics by displaying positive disposition during internship 	
Evaluation	<p>At the end of the internship, students should submit a high-quality report including the experience gained, requirements for additional skills and propose solution to the accounting-related issues identified during the internship. The report should be prepared adhering to the guidelines approved by the Faculty.</p> <ul style="list-style-type: none"> • Logbook maintenance 15 % • Mentor report 20 % • Internship report 40% • Viva-voce 25 %

Department of Financial Management

DEPARTMENT OF FINANCIAL MANAGEMENT

Introduction

The Department of Financial Management is one of the most notable departments of the Faculty of Management Studies and Commerce at the University of Jaffna, Sri Lanka, offering the Bachelor of Business Administration (BBA) Honours in Financial Management programme. The Department's curriculum is meant to equip students to take on leadership responsibilities in the corporate sector, as well as to make them sensitive to ethical and social issues and adaptive in a dynamic commercial environment. It provides students with a firm foundation in financial theory while also developing managerial competencies for the good of society. The students of the department have good employment opportunities, with two basic career routes recognised in the market. The first is Managerial Finance, which involves managing finance function for businesses in the manufacturing and trade industries while the second is careers in the financial services industry, such as Banking, Securities, Micro finance, small and medium scale enterprises, Real estate, and Insurance industry which creates and sells financial products or services.

a. Bachelor of Business Administration Honours in Financial Management

(i) Programme Learning Outcomes (PLOs)

Upon the successful completion of the Bachelor of Business Administration Honours in Financial Management, the graduates are expected to:

- PLO 01: Demonstrate the advanced theories and concepts in financial management, particularly in corporate finance.
- PLO 02: Analyse the financial market and its operations and the role of individual investors in the business.
- PLO 03: Apply effective financial information and communication technology in order to improve network and public relations.
- PLO 04: Develop interpersonal skills and teamwork to become a finance professional.
- PLO 05: Expand creative and effective financial decision-making skills necessary to face new challenges and opportunities.
- PLO 06: Develop managerial and entrepreneurial skills in order to create an innovative business.
- PLO 07: Use information technology as an effective tool to deal with financial problems and provide sound financial solutions.
- PLO 08: Demonstrate ethical and socially responsible behaviour with respect to financial planning and social development.
- PLO 09: Respond to changing environments in an adaptable and flexible manner.

- PLO 10: Advance personal development including the awareness of socially responsible dimensions in decision making.
- PLO 11: Create a vision for life in searching for career opportunities and during the progression of career path.
- PLO 12: Recognise the necessity for and have the ability to engage in independent and life-long learning.

(ii) Graduate profile

The aim of the Bachelor of Business Administration Honours in Financial Management Degree Programme is to produce graduates with a broad knowledge in theory, practice and methodology of disciplines that enable them to bear responsibility in a professional environment.

Level I & II

Common Programme

Faculty of Management Studies and Commerce

Course Title	Principles of Management			
Course Code	BBAH 11013			
Credit Value	3			
Status	Level 1 / Semester I /Compulsory

Course Title	Business Mathematics and Statistics			
Course Code	BBAF 12013			
Credit Value	3			
Status	Level 1 / Semester II /Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	-	-	105
Aim				
The aim of the course unit is to provide the basic understanding of mathematical and statistical concepts, knowledge and techniques required for the business students.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Describe the basic application of mathematical concepts in business – Solve the business problems using matrix operations – Explain the concept and rules of differentiation – Recognize the application of differentiation in solving business problems – Explain the concept and rules of integration – Apply integration for business decisions – Explain the basic concepts of business statistics – Compute measures of central tendency and dispersions – Describe the basic concept of correlation analysis – Explain the functions of linear regression – Use the correlation and regression analysis in business decision making – Perform time series analysis to solve the business problems – Explain the concept of probability – Use probability distributions in business decisions – Apply the hypothesis testing concept in business decision making 				
Syllabus Contents				
Business Mathematics Introduction of mathematical concepts to the business: basic concepts and skills of algebra, importance and usage of mathematical concepts to solve the business problems; Matrix and its application: types of matrices, matrix operations, determinant, inverse of the matrix and solving business problems using matrix applications; Differential calculus: rules of differentiation, maxima and minima functions; Application of differentiation: profit maximization and cost minimization; Integral calculus: rules of integration, definite and indefinite integrals; Applications of integration: marginal revenue, marginal cost and total change in revenue Business Statistics Introduction to statistics and its business application: functions, importance, scope and limitations of statistics in business, types of statistics, types of variables, levels of measurement, population and sample, application of statistics in the business world; Measures of central tendency and dispersions: Properties and measurement of central tendency and dispersions - mean, median, mode, range, percentile and quartile deviation, variance and standard deviation; Correlation analysis: introduction, types of correlation, coefficient of correlation, coefficient of determination; Regression analysis: introduction, assumptions of underlying linear regression, confidence and prediction intervals, regression equation, multiple regression model, individual regression coefficients; Application of correlation and regression analysis in business: measuring, predicting relationships and apply them in business decision making; Time series analysis: components- trend, cyclical, seasonal variations and				

<p>irregular variations, and forecasting; Probability: approaches to assigning probability, rules of computing probabilities, permutation and combination; Probability distributions: defining probability distributions, mean, variance and standard deviation of a probability distribution, types of probability distributions and business applications of the probability distributions; Hypothesis testing: procedures for testing hypothesis, one tailed and two tailed test of significance, errors in hypothesis testing, testing for a population mean with a known population standard deviation and unknown population standard deviation.</p>	
<p>Teaching and Learning Methods/Activities</p>	<p>Lectures, tutorials, group discussions, class discussions, participatory learning activities, virtual learning, presentations, individual assignments, textbook assignments, library research on topics or problems, open textbook study, problem solving or case study, applying statistical techniques to class data.</p>
<p>Evaluation</p>	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks. – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration. – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory and contains 20 multiple choice questions for 20 marks. ○ Part II: It contains two parts namely Part A and Part B. Part A consists of three questions in business mathematics and Part B consists of four questions in business statistics. These questions may include several parts. Students are expected to answer four questions by selecting at least one question from each part. Total marks for this part is 80.
<p>Recommended Readings:</p> <ul style="list-style-type: none"> • Brechner, R., & Bergeman, G. (2019). <i>Contemporary mathematics for business and Consumers</i> (9th ed.). Course Title	Business Economics			
Course Code	BBAH 12023			
Credit Value	3			
Status	Level 1 / Semester II /Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	---	10	95
Aim				
The aim of the course unit is to provide knowledge of economic theories and principles to address various economic issues and apply the knowledge in business decision-making.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the terms economics, microeconomics and macroeconomics – Relate the concepts of scarcity, choice and opportunity cost – Classify the different economic systems – Describe the demand and supply theories and market equilibrium – Explain the utility theory and indifference curve analysis – Derive the demand curve using indifference curve – Explain price theory and price elasticity of demand – Illustrate the relationship between various types of costs in the short and long run – Describe production function, stages of production and isoquants – Interpret the law of diminishing marginal return and marginal rate of substitution – Explain the different market structures – State major macroeconomic objectives of a government – Describe the approaches to national income accounting – Interpret the aggregate demand and aggregate supply model – Explain the types of unemployment and its consequences – Explain how monetary policy impacts interest rates and aggregate demand – Explain how appreciating or depreciating currency affects exchange rates – Describe the Fiscal policy and Monetary policy of Sri Lankan economy 				
Syllabus Content				
<p>Introduction to microeconomics: definition of the terms economics, microeconomics and macroeconomics, scarcity and opportunity costs, production possibilities frontier, various economic systems; Theory of demand and supply: utility theory and indifference curve analysis, determinants of demand and supply, factor market for labour, general equilibrium, price theory, Cost theory: meaning, types of cost, relationship between total, fixed and variable costs, marginal cost, comparing short run and long run costs; Production theory: meaning, production function, stages of production, law of diminishing return, isoquants, marginal rate of substitution; Market structures: perfect competition, monopoly, monopolistic competition, oligopoly, duopoly; Introduction to macroeconomics: Importance of studying macroeconomics, government macroeconomic policy objectives, National income accounting: aspects of national income accounting, three approaches to national income accounting; Macroeconomic Theory: The Keynesian approach, aggregate demand and supply, business cycle, Inflation and unemployment: causes and consequences of inflation and unemployment, The Philip curve, Macroeconomic policy: fiscal policy, monetary theory, supply side economic policies, IS-LM equilibrium and effect of fiscal and monetary policies, The foreign exchange market: foreign exchange markets, influences on exchange rates, government policy on exchange rates, The Balance of payments: the nature of the</p>				

balance of payments, surplus and deficit in the current account, rectifying current account deficits, The J-curve effects, globalization	
Teaching and Learning Methods/Activities	Lectures, tutorials, discussions, online learning activities, presentations, individual assignments, case studies, forum and debate
Evaluation	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study, debate, role play. <p>Summative Assessment:70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration – Question paper contains three parts <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 20 multiple choice questions for 20 marks ○ Part II: It contains questions in Microeconomics. Students are expected to answer two questions out of four questions. Total marks for this part is 40. ○ Part III: It contains questions in Macroeconomics. Students are expected to answer two questions out of four questions. Total marks for this part is 40.
<p>Recommended Readings</p> <ul style="list-style-type: none"> • Ahuja, H. L. (2019). <i>Advanced economic theory</i>. New Delhi: S. Chand Publishing. • Ahuja, H. L. Course Title	Financial Accounting II			
Course Code	BBAA12033			
Credit Value	3			
Status	Level 1 / Semester II/ Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	-	-	105
Aim				
The aim of this course unit is to equip students with knowledge of application of accounting standards in financial accounting in any type of organisation.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Identify the regulations applicable to financial accounting – Explain the legal background of a Limited Liability Company – Explain the concepts/provisions in the company act No 7 of 2007 – Discuss the need for Sri Lanka Accounting Standards – Define the terms in the prescribed accounting standards – Explain the accounting treatments given in the standards – List the disclosure requirements of the accounting standards. – Explain accounting entries for share/debenture issues – Explain accounting entries for redemption of shares/debentures – Explain accounting entries for reduction of capital – State the purpose of financial statements of Limited Liability Company – Identify specific accounting issues in Limited Liability Companies – Apply relevant accounting standards when preparing financial statements – Prepare the financial statements of Limited Liability Company – Recommend the disclosures to be made in the financial statements of Limited Liability Company 				
Syllabus Content				
<p>The regulatory context in financial accounting in Sri Lanka: preparation and presentation of financial statements as per companies Act No. 7 of 2007, the legal and the commercial view of financial accounting; Application of Sri Lanka accounting standards and Sri Lanka financial reporting standards: accounting for Statement of cash flow, income tax, accounting policies, changes in accounting estimates and errors, events after the financial reporting, Leases, revenue from contracts with customer, provisions, contingent liability and contingent assets; Financial statements for a limited liability company: issue of shares and debentures, redemption of shares and debentures, reduction of capital, financial statements of limited liability companies</p>				
Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, presentations, individual assignments			
Evaluation	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks. – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study and debate. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration. – Question paper contains two parts: 			

	<ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 20 multiple choice questions for 20 marks. ○ Part II: Students are expected to answer all four questions that may include several parts. Total marks for this part is 80.

Course Title	Marketing Management			
Course Code	BBAM 12043			
Credit Value	03			
Status	Level 1 / Semester II / Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	---	10	95
Aim				
The aim of the course unit is to provide an opportunity to the students to enhance knowledge about marketing theories, principles, strategies and concepts with their application.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define marketing, marketing management, and core concepts of marketing – Describe the basic marketing concepts and theories – Compare the different marketing philosophies which are applicable in marketing practices – Analyse the changing marketing landscape in the digital age – Assess the appropriateness of the business environment for a business – Develop marketing mix needed to the business – Classify the market into suitable segments – Design a target market by segmentation for a selected product or service – Discuss the relevant factors related consumer behaviour – Identify the major factors that influence business buyer behaviour – Explain how companies find and develop new product ideas – Describe the decisions companies make regarding their individual products and services – Evaluate the marketing strategy for an existing product and / or services – Identify the recent trends in marketing – Outline the steps in the marketing research process 				
Syllabus Content				
Introduction to marketing: basics of marketing, marketing concepts, understanding markets and customer needs, marketing management orientations; The changing marketing landscape: the digital age, online, mobile, and social media marketing; Marketing environment: micro and macro environment; Marketing mix: product, pricing, promotion, distribution, people, process and physical evidence; Market segmentation: geographic segmentation, demographic segmentation, psychographic segmentation, behavioral segmentation, targeting and positioning; Consumer Behavior: cultural factors, social factors, personal factors and psychological factors; Business buyer behavior: business marketing, business buyer behavior, business buyer decision process; New product development: new product development, new product development process, product lifecycle strategy; Designing and marketing services: the nature and characteristics of a service, service marketing strategies, service quality; Recent trends in marketing: explore the trends in marketing; Introduction to marketing research: what is marketing research, type of marketing research, steps in marketing research.				
Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, online learning activities, presentations, individual assignments, case studies, forum, field visit and debate.			
Evaluation	Formative assessment (In-course): 30% <ul style="list-style-type: none"> – At least three assessments for 30 Marks

Course Title	Introduction to Tourism and Hospitality Management			
Course Code	BBAT 12052			
Credit Value	2			
Status	Level 1 / Semester II /Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	30	---	10	60
Aim				
The aim of the course unit is to provide the basic knowledge and understanding of tourism and hospitality.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the concepts of travel, tourism, tourist, hospitality and hospitality management – Explain historical factors that encouraged the development of tourism activities – Identify the major participants and forces shaping the tourism industry – Discuss the career opportunities in the tourism and hospitality industry – Compare various types of tourism – Describe lodging operations – Discuss the role of hospitality manager in the hospitality industry – Describe significance of the workplace skills of the employees in the completion of the task – Recall the historical development of the lodging industry – Explain the hospitality management system 				
Syllabus Content				
<p>Introduction to tourism and hospitality: concepts of tourism, travel, tourist and hospitality; The history of travel and tourism: the empire era, the middle ages and the renaissance era, the grand tour era, the mobility era and the modern era; types of tourism: domestic tourism, international tourism, outbound tourism, dark tourism, cultural tourism, rural tourism; Tourism demand and travel motivators: basics of tourism demand, net travel propensity, gross travel propensity, case study-pattern of movement of tourists to Sri Lanka; travel motivators, physical motivators, Inter personal motivators, status & prestige. The hospitality industry: understanding the concept of hospitality management, the hospitality manager's role in the hospitality industry, demand and supply of hospitality, welcoming, workplace skills and expectations, careers in hospitality; Introduction to lodging operations: the evolution of lodging, classifications of hotel properties, meeting guests needs, forces shaping the hotel business, competition in the lodging business; Management of hospitality industry: planning in hospitality management, organizing in hospitality management, manpower analyzing in hospitality management, control in hospitality management.</p>				
Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, online learning activities, presentations, individual assignments, case studies, role play forum, field visit and debate.			
Evaluation	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study, debate and role play. <p>Summative Assessment: 70%</p>

Course Title	Business English II			
Course Code	BBAD 12062			
Credit Value	2			
Status	Level 1 / Semester II /Compulsory			
UTEL Benchmark	5			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	30	15	-	55
Aim				
The aim of the course is to improve Business English language skills by developing vocabulary.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> - Identify main and specific information in various reading selections related to business fields adopting Before-During-After reading strategies. - Demonstrate a significant enrichment of business and job-specific vocabulary - Analyze details in job descriptions and advertisements - Develop application procedure and interview skills - Use strategies for active listening to respond meaningfully. - Practice listening to complex text with varied structures, conversations and news items - Answer questions in job interviews with a degree of confidence and accuracy - Engage in individual and group presentations related to various careers - Recognize and incorporate sentence variety in writing, including coordination and subordination - Demonstrate the ability to write memos, CVs, cover letters and professional profiles 				
Syllabus Content				
<p>Reading: recognizing the facts given in various types of reading passages, magazine and newspaper articles using the sub skills of reading such as skimming, scanning and comprehension, Identifying and analyzing details in job descriptions and advertisements and Using terms / expressions used frequently in job interviews, orientation programmes, workshops, conferences and seminars / webinars; Grammar: Define verbs and different verb forms, including infinitive, gerund, present participle, past participle, stative verbs, dynamic verbs, and auxiliary verbs, demonstrating the usage of the twelve tenses of English and their communicative functions, forming questions and negative statements and constructing active and passive voice sentences; Writing: Writing paragraphs related to business field and personal notes to relatives and friends. Identifying different structures of CVS and writing effective CVs and cover letters using appropriate vocabulary and grammar; Speaking: Introducing oneself and others, asking for information, giving information, inviting and thanking. Conducting a SWOT analysis on oneself, constructing questions on both 'Yes / No type' and 'Wh'-question forms and formulating appropriate responses for questions - Mock Interviews; Listening: Identifying the overall and internal organization of business related audio or video records and answering the questions.</p>				
Teaching and Learning Methods/Activities	Lectures, Group discussion, Task-based language learning, student centered learning and Content and Language Integrated Learning (CLIL), self-learning activities using LMS & Computer Assisted Language Learning (CALL).			
Evaluation	Formative Assessment (In-course) 30% <ul style="list-style-type: none"> – Four assessments will be conducted to evaluate each skill. – The assessment could be in any forms such as classroom 			

	<p>assignment, take-home assignment, oral presentation and online assessment</p> <ul style="list-style-type: none"> – Formative assessment will be considered for 400 marks (100 marks for the assessment of each skill) – The marks obtained will be converted into 30 % to be added with the final marks. <p>Summative Assessment 70%</p> <ul style="list-style-type: none"> – Duration of the question paper is of two hours consisting questions based mostly on skills like reading and writing along with selected grammatical components. – The number of questions and the marks allocated to each question may vary depending on the type of questions. – All the questions should be answered and the marks allocated for the final assessment is 100. – Marks obtained will be converted into 70 % to be added with the final marks.

Course Title	Social Psychology			
Course Code	BBAD 12072			
Credit Value	2			
Status	Level 1 / Semester II /Enhancement			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	30	---	-	70
Aim				
The aim of the course unit is to expose students to the essential theories and applications of social psychology towards gaining skills, knowledge and analyze human behaviour as it occurs within the social context				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the basic concepts of Social Psychology – Explain the key theoretical perspectives in studying human social behaviour – Analyse the key role of self in the social world – Describe the value of self-knowledge to manage in different social contexts – Evaluate the major role of perception in impression, judgment, and emotions – Apply social psychological concepts and theories learned in class to evaluate and respond to the social world – Discuss the group influence in action and the importance of Conformity, Compliance, and Obedience in interpersonal relationships – Evaluate the motivations of prosocial behaviour in emergency social work – Explain the roots of human aggressions in ongoing relationships – List the techniques of controlling aggressions at family and work 				
Syllabus Content				
<p>Introduction to social psychology: the historical development of social psychology, key concepts that form an understanding of human social behaviour, Need of Social Psychology in human life, sociology of love; The self in a social world: learning about the self, sources of self-knowledge, managing the self in different social context, personal vs. social identity, self-esteem and social comparison; Person perception: forming impression of others, impression management, accuracy of judgments recognition of emotions; Evaluating and responding to the social world: understanding the social world, attitude formation, change in attitude towards the environment, the fine arts of persuasion; Changing others behaviour: group influence in action, how we are influenced by others even when they are not there; Conformity, Compliance, and Obedience, Stereotypes, prejudices, & discrimination, interpersonal relationship & intimacy, obedience to authority; Helping others (prosocial behaviour): motives for personal behaviour, responding to an emergency; Aggression: perspectives on aggression, Hurting Others, roots of violence, causes of human aggression, aggression in ongoing relationships, bullying and aggression at family and work, control of aggression , some valuable techniques.</p>				
Teaching and Learning Methods/Activities	Lecture by the Lecturer, recitation, group discussion, student report by individual or groups, library research, drama, role-playing, making of posters by students, problem-solving of cases studies			
Evaluation	Formative assessment (In-course): 100% <ul style="list-style-type: none"> – Four assessments; each carry twenty-five marks 			

	<ul style="list-style-type: none"> – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study, field visits, etc. – The duration of the assessment might vary depending on the nature of the assessment.

Course Title	Events Management			
Course Code	BBAT 21013			
Credit Value	3			
Status	Level 2 / Semester I /Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	---	10	95
Aim				
The aim of the course unit is to provide the students with the comprehensive theoretical and practical knowledge on events management.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the concept of events and events management – Identify the major participants in organizing events – List the techniques and strategies required to manage the project successfully – Explain challenges faced by the event industry in the emerging business environment – Describe the project planning, and strategies used towards project implementation – Explain the role of events' designing with the reflection of theme and pragmatic experience in the modern business world – List the various types of project evaluation techniques – Explain techniques to manage health and safety related risk at the workplace – Formulate the marketing strategies to promote the cultural events and festivals – Discuss the mega events and its substantial contribution to the tourism industry – Point out the key logistical issues in organizing corporate events – Explain the impacts of cultural events and festivals marketing on the economy – Describe the event operations and legal issues in the event organizing process – Examine the significance of the sustainable event industry in tourism development – Examine the role of the media in organizing and exhibiting the events 				
Syllabus Content				
<p>Introduction to events management: meaning of events and events management, the challenges of events management, the place events in human history and cultures, the events industry, what business are we in, the role of the event manager, the events profession and education; Managing event projects: events as projects, project management perspectives, event project definition, organization and framework, project parameters, stakeholder requirements and needs, project planning, project optimization, project evaluation techniques, project crashing, project risk management, project cost breakdown structures, project implementation; Event design and production: introduction to event design, recent developments in event design, events as designed experiences, concept and theme, understanding event experiences; Event operations: the legal environment, insurance, regulations, licenses and permits, events contracts, event logistics; Event marketing: event marketing planning, event sponsorship; Event health, safety and risk management: health and safety legislation, health and safety management, risk management, risk assessment, specific event risks; Mega-events: defining mega-events, mega-event periods, mega-event tourism; Events in the public and cooperate sectors: the public sector, events in the public sector, not-for-profit events, categorization of corporate events, key logistical issues for corporate events, the corporate event customer, corporate event evaluation; Cultural events and festivals: cultural events, festivals, types of cultural events and festivals, programming cultural events and festivals, marketing cultural events and festivals, the public role of cultural events and festivals;</p>				

Event impacts, sustainability and legacy: event impacts on the tourism and hospitality industry, measuring impacts and evaluating events, event sustainability, event legacies; Events and the media: the role of the media in events management, the media and links to stakeholders, media management, the impact of media coverage on events.	
Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, online learning activities, presentations, individual assignments, case studies, role play, forum, field visit, debate guest speakers, exhibits and displays, and mock conventions.
Evaluation	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study, debate, mock conventions, and role play. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hours duration – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 20 multiple choice questions for 20 marks. ○ Part II: Students are expected to answer four questions out of six questions

Level III & IV

**Bachelor of Business
Administration
Honours in Financial
Management**

Department of Financial Management

Course Title	Corporate Finance			
Course Code	BBAF 31013			
Credit Value	3			
Status	Level 3 / Semester I/ Core			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	-	10	95
Aim				
The aim of the course unit is to provide students with integrated knowledge in the concepts, theories and techniques of corporate finance and to develop corporate finance related decision-making skills.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Describe the scope of corporate finance – Perform advanced time-value based calculations – Analyse the capital structure decisions of firms – Explain the different theories on capital structure – Discuss the working capital needs of an institution and the techniques to manage working capital – Evaluate a company's accounts receivable, inventory, and accounts payable management – Assess the implications of comparative working capital management policies – Calculate operating and cash conversion cycles – Estimate working capital needs of a firm – Discuss different types of risks associated with projects – Apply different capital budgeting techniques to make investment decisions under risk and uncertainty conditions – Discuss different types of dividend policies adopted by companies – Explain the implications of dividend irrelevancy theory – Compare financial leverage and operating leverage – Identify causes of financial and operating leverages – Calculate a firm's operating breakeven point 				
Syllabus Contents				
<p>Overview of corporate finance: scope of corporate finance, tasks and corporate objectives; Advanced techniques in time-value of money :annuity, growing annuity, perpetuity, growing perpetuity with continuous compounding rate and effective interest rate; Capital structure choice: capital structure decisions, target capital structure, business and financial risks, determining the optimal capital structure, capital structure theories; Working capital management: nature, importance and elements of working capital, working capital policies, cash operating cycle, accounts payable and accounts receivable, relevant accounting ratios, estimating working capital needs of the firm, cash management, inventory management and receivables management; Capital budgeting investment decisions under risk and uncertainty: risk associated with projects, methods to calculate risk and uncertainty in capital budgeting: sensitivity, simulation, decision tree, risk-adjusted discount rate, probability distribution approach, certainty equivalent method; Dividend policy and theories: types of dividend: cash dividend, scrip dividend, forms of share repurchase and the relevant and irrelevant theories of dividend policy, dividend valuation model: the Gordon growth model and Modigliani and Miller's</p>				

dividend irrelevancy theory; Leverage: meaning of leverage, financial leverage and operating leverage, causes of financial leverage and operating leverage and the break-even analysis at different levels of leverage.	
Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, class discussions, participatory learning activities, virtual learning, presentations, individual assignments, textbook assignments, library research on topics or problems, open textbook study and case study.
Evaluation	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks. – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration. – Question paper contains two parts: <ul style="list-style-type: none"> o Part I: It is compulsory. It contains 20 multiple choice questions for 20 Marks. o Part II: Students are expected to answer any four questions out of six questions that may include several parts. Total marks for this part is 80.

Course Title	Operations Research Techniques for Business			
Course Code	BBAF 31033			
Credit Value	3			
Status	Level 3 / Semester I/ Core			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	10	--	95
Aim				
The aim of the course unit is to provide students with the knowledge and skills in practical applications of various operations research methods and techniques to solve the problems in business.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Explain the overview of operations research – Elaborate the characteristics of different types of decision making tools to be used in operations research – Solve the business problems using linear programming techniques – Discuss the linear programming applications specifically in finance – Apply transportation techniques to solve business problem – Explain the trans-shipment problems and solutions – Use the Hungarian method to solve assignment problem – Discuss the application of queuing models in business decisions – Describe the fundamental issues in inventory planning – Explain various inventory control techniques and their applications – Recognize challenges in supply chain management – Discuss the key enablers in supply chain improvement – Find the solutions in business problems using decision analysis – Display a decision tree to find optimal decisions – Use software in practical business cases to drive solutions 				
Syllabus Contents				
<p>Overview of operations research: introduction, scope, features, phases and types of operations research; Types of decision making tools in operations research: uses, importance and characteristics of various types of techniques and tools in operations research and limitations; Linear Programming Problem (LPP): application of LPP in business, advantages of LPP, general LPP, formulation of LPP, graphical method and simplex method; Linear Programming applications in finance: portfolio selection, financial planning; Transportation problem: general structure, initial solutions methods, optimal solution methods, special cases in transportation problem; Trans-shipment problem: meaning of trans-shipment problems, main characteristics of trans-shipment problems and solutions for transshipment problems; Assignment problem: meaning and definition of assignment problem, mathematical formulation, Hungarian method; Queuing models: introduction, analysis of queuing process, properties of queuing system, notations, service system, single and multiple channel models; Inventory management and control: introduction to inventory system, inventory classification, inventory planning, issues in inventory planning, basic concepts in just in time, distribution resource planning and material requirement planning, economic order quantity model, economic production lot size model, probabilistic reorder point inventory models with and without lead time; Supply chain management: introduction and development, objectives and needs, importance of value chain, participants in supply chain and customer focus, key enablers in supply chain improvement, challenges in supply chain management; Decision analysis: introduction, decisions under certainty, risk, and uncertainty, analyzing link and successive decisions, constructing decision trees, calculation of expected monetary values and making optimal decisions; Software: features, uses and its application in business problem solving.</p>				

Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, class discussions, participatory learning activities, virtual learning, presentations, individual assignments, textbook assignments, library research on topics or problems, open textbook study and case study.
Evaluation	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks. – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration. – Question paper contains two parts: <ul style="list-style-type: none"> o Part I: It is compulsory. It contains 20 multiple choice questions for 20 Marks. o Part II: Students are expected to answer any four questions out of six questions that may include several parts. Course Title	Research Methodology in Finance			
Course Code	BBAF 31043			
Credit Value	3			
Status	Level 3 / Semester I/ Core			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	-	-	105
Aim				
The aim of the course unit is to provide students with the necessary knowledge and skills on research methods in finance and enable them to undertake research in finance independently.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Describe the meaning and objectives of research – Explain the nature, scope of research and the process of conducting research in finance – Identify research problem/ gaps in relevant issues in finance – Explain the purpose and functions of literature survey – Develop conceptual framework, conceptual model and hypotheses – List the qualities of hypotheses – Describe types of variables – Discuss the types of research design and issues in research design – Discuss the sampling techniques – Explain primary and secondary data collection methods – Design appropriate tools for data collection – Discuss the techniques for data analysis – Present the results appropriately and effectively – Interpret the results linking to relevant theories and previous empirical work – Make a critical evaluation of published journal articles – Manage the ethical issues and challenges in conducting research – Develop a research proposal in finance 				
Syllabus Contents				
Introduction to research: definitions and objectives of research, importance of research in finance, characteristics of a good research in finance, research approaches, types of research, the process of scientific research; Formulating and clarifying research problem: formulating a research problem, characteristics of a good research problem, writing research questions and objectives, generating and refining research ideas; Literature review and conceptual framework: content and purpose of a literature review, critical analysis of literature, sources of literature, searching literature, conceptual frame work and conceptual model; Developing hypotheses: meaning and good qualities of hypotheses, types of hypotheses, formulation of hypothesis; Variables and measurement: concept, variables, indicators, types of variables, levels of measurement, measurement issues in research; Research design: types of research design, issues in research design: causality, endogeneity, generalization; Sampling: sampling process, probability and non-probability sampling techniques; Data collection methods: primary and secondary data collection methods, developing questionnaire, validity and reliability; Data analysis: data preparation, univariate analysis, bivariate analysis, multivariate analysis, mixed methodology, panel data analysis, interpreting and contextualising the results; Research ethics and integrity: ethical issues related to research, publishing, plagiarism and self-plagiarism. Writing research proposal and report: content and layout of a research proposal/paper/dissertation, formatting and referencing style				
Teaching and Learning Methods/Activities	Lectures, virtual learning, tutorials, group discussions, participatory learning activities, individual and group presentations, group project, individual assignments, problems-based discussions.			
Evaluation	Formative assessment (In-course): 30%			

	<ul style="list-style-type: none"> – At least three assessments for 30 Marks – The assessments could take any forms such as classroom assignment, take-home assignment, group assignment, quiz, presentation. <p>Summative Assessment:70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration – Question paper contains two parts: <ul style="list-style-type: none"> o Part I: It is compulsory. Course Title	Project Management			
Course Code	BBAF 41013			
Credit Value	3			
Status	Level 4 / Semester I / Core			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	---	10	95
Aim:				
The aim of the course unit is to develop students with the skills and competencies for planning and controlling projects and knowledge of interpersonal issues that drive successful project deliverables.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define meaning and scope of project and project management – Describe the key concepts and evolution of project management – Differentiate between projects and operations – List out the project constraints – Explain the project management knowledge areas, tools and techniques – Describe project management process groups, project life cycle and organization – Execute project planning and scheduling techniques – Explicate the concept of project appraisal – Explain project risk management – Illustrate development of an effective project team – Analyze project cost management and budget baseline – Discuss preparation of project communication management plan – Analyze the project stakeholder engagement – Develop skills for preparation of feasibility study report – Prepare project proposal in various scenarios – Apply project management software in the practical working environment 				
Syllabus Contents				
<p>Key concepts and framework of project management: meaning and scope of project and project management, history of project management, project management framework, attributes of project management, project and operation, project constraints, project management knowledge areas, program and portfolio, project success and failure; Project management process groups: initiation, planning, executing, monitoring and controlling and closing out, process interaction and project management process mapping; Project life cycle and organization: characteristics of project life cycle and project phases, project stakeholders and organizational structure; Project planning and scheduling techniques: work breakdown structure, Gantt chart, critical path method, Programme Evaluation Review Techniques (PERT), crashing, resource allocation; Project appraisal: meaning of project appraisal, appraisal methods: socio-economic, financial, marketing, technology, political, environmental, legal and management; Project risk management: sources of risk, types of risk, risk management process; Project team development: five stages of project team development, essentials of developing an effective team, roles and responsibilities of team; Project cost management: types of cost, importance of cost management and cost management process; Budgeting the project: methods of budget, cost estimating, preparation of budget, work element costing, activity versus program budgeting, budget uncertainty and earned value management; Project communication management: communication management process, plan, manage and control of project communication management; Project stakeholder engagement: different stakeholders on a project, stakeholder classification models, stakeholder engagement assessment matrix, skills needed to manage stakeholder; Project feasibility study: purpose of project feasibility study analysis, writing feasibility study report and project proposal; Project management</p>				

application software: features, functions and application for planning and scheduling, team collaboration, documentation, reporting and project budgeting.	
Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, virtual learning, class room discussions, library research on topics, open textbook study, use of recordings, presentations, individual assignments, take home assignments, forum and case study.
Evaluation	<p>Formative Assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks – The assessments could take any forms such as classroom assignment, take-home assignment, group assignment, quiz, presentation. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration – Question paper contains two parts: <ul style="list-style-type: none"> o Part I: It is compulsory. It contains 20 multiple choice questions for 20 Marks. o Part II: Students are expected to answer four questions out of six questions that may include several parts. Total marks for this part is 80.

Title	Strategic Financial Management			
Course Code	BBAF 41023			
Credit Value	3			
Status	Level 4 / Semester I / Core			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	-	-	105
Aim				
The aim of the course unit is to provide students with the knowledge and skills on the concepts and practices of strategic management process and enable them to analyse and evaluate financial implications of strategic alternatives, bringing together corporate finance and strategic management perspectives.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> - Describe the meaning and importance of strategic management and types of strategy - Explain the integrative nature of strategic management process - Conduct the internal and external environment analysis using appropriate techniques - Describe the strategic choices at various levels - Discuss the factors to be considered in strategy implementation - Explain the link between strategy, financial planning and value creation - Describe the purposes and methods of business valuation - Assess the value of a business using appropriate valuation methods - Discuss the purposes and various forms of corporate restructuring - Explain the factors influencing merger or takeover decisions - Calculate the exchange ratio and purchase consideration for mergers/takeovers - Compute the expected gains from mergers/takeovers - Evaluate financial implications of various strategic financing decisions - Discuss the ways of dealing with the financial distress - Predict the financial distress and bankruptcy of a business 				
Syllabus Contents				
<p>Overview of strategic management: meaning of strategy and strategic management, importance of strategic management, features of strategy, levels and types of strategy, stakeholder management approaches to strategy; Strategic management process: the integrative nature of strategic management process, strategic objective, resources, capabilities, and core competencies, internal and external analysis, strategic formulation; Strategy implementation: governance, strategic leadership, culture, organisational designs, strategic evaluation and control; Strategy and financial planning: financial strategy formulation, strategy and value creation, sources of value creation; Strategic and financial planning: financial strategy formulation, strategy and value creation, sources of value creation; Business valuation: meaning and purposes of business valuation, information requirements for valuation, asset based valuation methods, earning based valuation methods, dividend valuation method, discounted cash flow method; Corporate restructuring: meaning and purpose of corporate restructuring, corporate restructuring strategies- merger and acquisition, joint venture, strategic divestment, sell-offs, corporate demerger, spin-offs, equity carve-outs, management buy-outs (MBOs), leveraged buyouts (LBOs), private equity; Evaluating financial implications of strategic financing decisions: factors to be considered in mergers, takeovers, and acquisitions, the purchase consideration, evaluating an offer (bid), exchange ratio, calculating the expected gains from takeovers, measuring business success, value creation and companies' strategies taking into account risk and uncertainty into investment decisions; Business failure and prediction of corporate bankruptcy: financial distress, dealing with financial distress, models to predict the financial distress, corporate bankruptcy.</p>				
Teaching and Learning	Lectures, virtual learning, tutorials, group discussions, participatory			

Methods/Activities	learning activities, individual and group presentations, individual assignments, the problem-based learning, case study.
Evaluation	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks – The assessments could take any forms such as classroom assignment, take-home assignment, group assignment, quiz, and presentation. <p>Summative Assessment:70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration – Question paper contains two parts: <ul style="list-style-type: none"> o Part I is compulsory. Course Title	Econometric Modelling and Application			
Course Code	BBAF 41033			
Credit Value	3			
Status	Level 4 / Semester I / Core			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	20	30	---	100
Aim				
The aim of the course unit is to provide students a comprehensive knowledge and practice in the applications of software and articulate them appropriately to contemporary problems in different context.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the terms econometrics and financial econometrics – Describe the econometric model and methodology of econometrics – State the uses of financial econometrics – Identify the types and uses of data- time series data, cross-sectional data, panel data – Explain the techniques of tabulation, graphs and diagrams for data presentation using software – Interpret the correlation coefficient – Explain the linear simple and multiple regression analysis using software – Discuss uses of regression, regression versus correlation, and coefficient of determination – Describe the hypothesis testing, point estimation and interval estimation – Discuss predictions, goodness of fit, and modeling issues – Elaborate the violating the assumptions of the classical linear regression model – Perform the tests of multicollinearity, heteroskedasticity, autocorrelation using software – Apply panel data techniques, recognizing their strengths and limitations – State the usage of Hausman test to select fixed effects model or random effects model – Employ time-series analysis techniques for decision making and policy planning. 				
Syllabus Contents				
Introduction to econometrics: meaning and objectives of econometrics, types of econometrics, econometric model, methodology of econometrics; Financial econometrics: meaning and objective of financial econometrics, uses of financial econometrics, types of data- time series data, cross-sectional data and panel data; Techniques for data presentation: tabulation, graphs and diagrams; Correlation: nature and direction of the relationship, correlation coefficient; The Classical Linear Regression Model (CLRM): uses of regression, regression versus causation, regression versus correlation, coefficient of determination, simple and multiple regression using EViews /Stata; Hypothesis testing: probability distribution of the least squares estimators, estimating the variance of the error term, point and interval estimation, and hypothesis testing; Predictions, goodness of fit, and modeling issues: least squares prediction, measuring goodness of fit, modeling issues; Violating the assumptions of the CLRM: multicollinearity, heteroskedasticity, autocorrelation, misspecification- wrong regressors, measurement errors and wrong functional forms; Panel data regression models: importance of panel data, pooled OLS regression, the fixed effects model, random effects model; Time series econometrics: Vector Auto Regression (VAR) model and Auto Regression Distributed Lag (ARDL) model.				
Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, practical, virtual learning, presentations, use of video recording, individual assignments, case study.			
Evaluation	Formative assessment (In-course): 30% <ul style="list-style-type: none"> – At least three assessments for 30 marks – The assessments could take any forms such as classroom 			

	<p>assignment, take-home assignment, quiz, presentations, case study and practical exam.</p> <p>Summative Assessment: 70%</p> <p>Written Examination</p> <ul style="list-style-type: none"> – End of course written examination is of two hour duration – Question paper contains two parts: <ul style="list-style-type: none"> o Part I: It is compulsory. It contains 25 multiple choice questions for 25 marks o Part II: Students are expected to answer three questions out of five questions that may include several parts. Total marks for this part is 75. o The total marks obtained out of 100 will be converted into 60%. <p>Practical Examination</p> <ul style="list-style-type: none"> – Duration of the question paper is two hour. – Students are requested to answer all the questions. – The total marks of practical examination obtained out of 100 will be converted into 40%. <p>*Students should attend both examinations to complete the course unit</p>

Course Title	Dissertation in Finance
Course Code	BBAF 42018
Credit Value	8
Status	Level 4 / Semester II / Core
Notional hours	800
Aim:	
The aim of the course is to provide students with the knowledge and skills required to conduct a research independently with the guidance of the supervisor and write up a dissertation in a specific topic in the field of finance.	
Intended Learning Outcomes	
<ul style="list-style-type: none"> – Apply a systematic knowledge to recognize the issues in the key areas of finance – Conduct a literature review to employ an appropriate conceptual framework to approach the research problem – Design research method and choose a research strategy, – Perform financial and economic analysis using the appropriate software packages – Conclude valid reasons for the findings, based on valid research methods, analysis and arguments – Prepare the final report in accordance with the academic guidelines 	
Evaluation	<p>The students should submit a dissertation and face a viva-voce. The dissertation should be prepared adhering to the guidelines approved by the Faculty.</p> <ul style="list-style-type: none"> • Interim presentation -10 % • Dissertation-70 % • Viva-voce -20 %

Course Title	Internship in Finance
Course Code	BBAF 42026
Credit Value	6
Status	Level 4 / Semester II/ Core
Notional hours	600
Aim	
The aim of this course is to provide working experience to the students in the real business practices and to apply their university-learned knowledge, theoretical practice and skills into real business.	
Intended Learning Outcomes	
<ul style="list-style-type: none"> – Apply the knowledge and skill which gained from the academic program – Demonstrate professional ethics by maintaining a pleasant attitude during the internship – Work with various stakeholders of an organization to show appreciation and respect for distinct groups of experts. – Develop work habits and attitudes for job success – Perform task with various group of people to show their talent and ability – Manage real life challenges in the workplace by analyzing work environment and choosing appropriate set of skills acquired from the degree programme – Record the work experience learned during the internship by submitting report on internship along with logbook 	
Evaluation	<p>At the end of the internship, students should submit a high-quality report including the experience gained, requirements for additional skills and propose solution to the finance-related issues identified during the internship. The report should be prepared adhering to the guidelines approved by the Faculty.</p> <ul style="list-style-type: none"> • Logbook maintenance 15 % • Mentor report 20 % • Internship report 40% • Viva-voce 25 %

Department of Human Resource Management

Introduction

The Department of Human Resource Management is one of the academic departments contributing to the development of the human resource management field in the country by offering model academic solutions. Initially, the Honours Degree in Human Resource Management was offered under the Department of Management Studies from 1994. The Department of Human Resource Management was established in 2010 along with the establishment of three other departments of the Faculty of Management Studies and Commerce under the faculty restructuring programme. Dr.(Mrs).S.M.C.Mahenthiran Aloysius served as the Head of the Department from 2010 to 2016. In 2017, Dr.(Mrs).T.Raveendran was appointed as Head and has been serving up to now. The Department recognizes the strategic importance of human capital in business and remains focused to this end. The honours degree programme in human resource management is meant to equip students with the knowledge, capabilities and abilities needed to drive both private and public institutions in Sri Lanka and the globe. Our strengths are well qualified lecturer panel and a well-equipped Language Lab for improving the English language proficiency of HR students. Our carefully developed curriculum covers all aspects of HRM considering the practical as well as the theoretical facets of HRM, while taking into consideration the new trends in HRM. We have embarked on a well-planned out journey to integrate and collaborate with the industry to provide our learning partners the much-needed exposure to the industry. This include mentoring, shadowing, guest sessions, industry visits, problem-based learning and internships.

a. Bachelor of Business Administration Honours in Human Resource Management**(i) Programme Learning Outcomes (PLOs)**

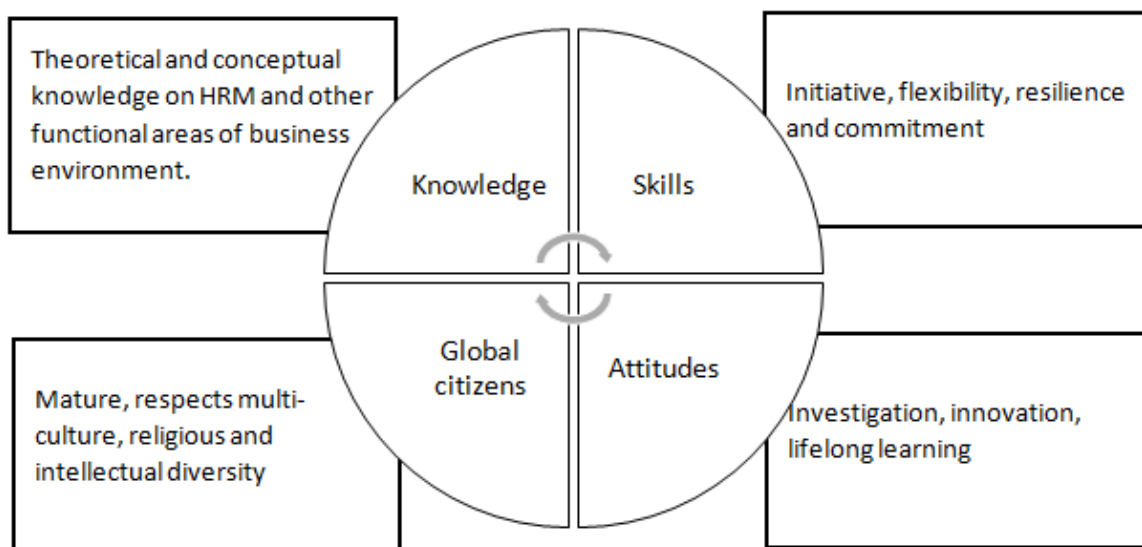

Upon the successful completion of the Bachelor of Business Administration Honours in Human Resource Management, the graduates are expected to:

- PLO 01: Demonstrate the advanced concept and theoretical knowledge in the core area of HRM.
- PLO 02: Demonstrate adequate practical knowledge and application in areas such as Management, Organisational Behaviour, Operations Management, Project Management, Quantitative Techniques, and Entrepreneurship.
- PLO 03: Employ communication skills to convey one's views and attitudes to help with social interactions.
- PLO 04: Practice teamwork and leadership skills in working with peers for projects, training programmes, and various assignments.
- PLO 05: Apply creativity and problem-solving skills in both theoretical and practical scenarios.

- PLO 06: Use managerial and entrepreneurial skills, not solely limited to the subject knowledge to search for employment opportunities, but also to be innovative in creating new business opportunities.
- PLO 07: Demonstrate information usage and management skills during the learning process, as well as in the working environment.
- PLO 08: Apply networking and social skills both in personal and work lives for effective involvement in assigned responsibilities.
- PLO 09: Demonstrate adaptability and flexibility to various changes in the practices of HRM and show the ability to absorb new trends.
- PLO 10: Demonstrate good attitudes, values and professionalism in practising the knowledge gained from the degree programme and utilise them for the achievement of organisational excellence.
- PLO 11: Create a vision for life in searching for career opportunities and during the subsequent progression of career path.
- PLO 12: Choose self-updating and lifelong learning strategies in personal development with a vibrant set of goals.

(ii) Graduate profile

The aim of the Bachelor of Business Administration Honours in Human Resource Management Degree Programme is to produce graduates with a broad knowledge in theory, practice and methodology of disciplines that enable them to bear responsibility in a professional environment.

Level I & II

Common Programme

Faculty of Management Studies and Commerce

Course Title	Principles of Management			
Course Code	BBAH 11013			
Credit Value	3			
Status	Level 1 / Semester I /Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	---	10	95
Aim				
The aim of the course unit is to provide the knowledge of fundamentals of management and its practices in the modern business world.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the core concepts in management – Explain the evolution of the theories of management – Describe the managerial skills and managerial roles – List the functions of management – Describe the concept of planning, its types and process – Describe the decision making process – Illustrate the types of organisational structures – Examine the features of a good organizational structure – Describe different leadership styles and leadership approaches – Describe principles related to directing – Propose the leadership style/s for better outcomes in a simulated situation – Explain the communication process in organisations – Describe the barriers of communication and the ways to overcome them – Discuss the theories of motivation – Suggest the controlling techniques – Apply the knowledge of management in solving a business problem 				
Syllabus Content				
<p>Introduction to management: nature and characteristics of management, basic concepts of management; Evolution of management thoughts: scientific management, administrative management, bureaucratic approach, human relations approach and the modern approaches; Understanding manager's job: managerial levels, skills and roles, corporate social responsibility; four functions of management; Planning: definition, nature and scope of planning, importance of planning, basic principles of planning, categories and levels of planning, planning process, advantages and limitations of planning, measures to overcome limitations of planning; Decision making: introduction, decision making models, steps in decision making; Organizing: meaning and characteristics of organisation, objectives, process of organizing, advantages of organisation, formal and informal organisation, Organisational structure; Leading and directing: definition, importance of leadership, traits of effective leaders, approaches to leadership, leadership styles; direction, principles of direction; Communication: introduction, characteristics of communication, importance of communication, qualities of a good communication system, process of communication, types of communication, models of communication, barrier to effective communication, overcoming the barriers; Motivation: definitions, process of motivation, sources of motivation, theories of motivation; Controlling: definition, features of controlling, importance of controlling, limitations of controlling, the control process, characteristics of an effective control system, types of control, techniques of control; Contemporary issues in management.</p>				

Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, online learning activities, presentations, individual assignments, case studies, forum, field visit and debate.
Evaluation	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study, debate, role play. <p>Summative Assessment:70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 20 multiple choice questions for 20 Marks ○ Part II: Students are expected to answer four questions out of seven questions that may include several parts. Total marks for this part is 80.

Course Title	Information Technology			
Course Code	BBAF 11052			
Credit Value	2			
Status	Level 1 / Semester 1 /Compulsory			
Notional hours	Theory	Practical	Field/Industrial visits	Independent learning hours
	20	30	-	50
Aim				
The aim of this course unit is to provide knowledge and skills required to apply information technology to business.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the terms data, information, Information Technology (IT), and Information and Communication Technology (ICT) – Discuss the issues, ethical use of IT and ergonomics in current business world – Assess the uses of information technology in business and real-life environments – Identify the physical components of computer system and its functions – Classify the logical components of computer system and its uses – Describe data communication and it's modes and elements – Explain basic networking principles and security measures to organise a local area network – Recognize current Internet and web technologies for a business environment – Operate on latest graphical environment of computer system – Choose software applications for documentation, reporting and analyses related to businesses. – Evaluate the usage of business applications in different cloud platforms 				
Syllabus Content				
<p>Introduction to Information Technology: definitions of data and information, introduction and basic elements of Information technology, uses of IT in business, health issues, ergonomics & the environment, cyber ethics, threats, safeguarding computers and communications systems; Computer system: physical components and logical components of computer system; Data communication and networks: data communication basic concepts, introduction to computer networks, components of computer networks, Open System Interconnection (OSI) model, data transmission media, IP addressing and configuration, introduction to network security; Internet and World Wide Web: internet and web technologies, cloud computing, social media, e-commerce and internet services; Applications for business: Working on graphical user interface (GUI) environment of computer system, Create and managing different types of files, organizing folders, typing in Unicode font for local language, working with applications for business documentations, reports and presentation, working with spreadsheet applications for business calculations and analyses; Cloud applications for business and organizational environment: working with cloud applications for documentation, spreadsheet analysis, presentation, forms, calendar and meeting and web site design, Create, manage and share files in cloud.</p>				
Teaching and Learning Methods/Activities	Lectures, virtual learning, practical, tutorials, group discussions, participatory learning activities, presentations, individual assignments, case studies and forum.			
Evaluation	Formative Assessment (In-course): 40% <ul style="list-style-type: none"> – At least four assessments for 40 Marks 			

	<ul style="list-style-type: none"> – The assessments could in the form of classroom assignment, Lab practical, take-home assignment, quizzes, presentations, and case studies. <p>Summative Assessment: 60%</p> <p>Written Examination</p> <ul style="list-style-type: none"> – End of course written examination is of two-hour duration – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 25 multiple choice questions for 25 marks. ○ Part II: Students are expected to answer three questions out of five questions that may include several parts. Total marks for this part is 75. ○ The total marks of written examination obtained out of 100 will be converted into 60%. <p>Practical Examination:</p> <ul style="list-style-type: none"> – Duration of the examination is two-hour duration – All questions should be answered. – The total marks of practical examination obtained out of 100 will be converted into 40%. <p>*Students should attend both examinations to complete the course unit</p>

Course Title	Business English I			
Course Code	BBAD 11062			
Credit Value	2			
Status	Level 1/ Semester I /Compulsory			
UTEL Benchmark	5			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	30	15	-	55
Aim				
The aim of the course is to provide opportunities for the learners to develop English Language skills with a focus on business contexts and environments.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Respond to gist and details in a range of simple and moderately complex texts related to business and administration. – Use contextual, structural, and morphological clues to deduce meaning of unfamiliar words and phrases. – Interact in Face to Face social conversations related mostly on personal information. – Demonstrate the ability to give and get information using a range of functional language. – Construct simple sentences incorporating appropriate mechanics and basic grammar such as parts of speech, subject-verb agreement and passivation. – Formulate appropriate questions and responses related to real life situations. – Identify the major and minor details of conversations, short lectures and news items. – Write personal notes to convey various messages. – Produce multiple drafts of different types of paragraphs describing people, places and objects related to business field. 				
Syllabus Content				
<p>Reading: Identifying the main idea of current or business related passages adopted from business magazines, newspapers and books, recognizing the meanings of new words, answering questions based on the passages. Grammar: Recognizing the forms, functions and uses of present, past and future tenses. Positive, negative and interrogative forms in all the tenses and their communicative functions, usage of prepositions and conjunctions, differentiating the active voice sentences and passive voice sentences and transformation of the sentences. Writing: Writing meaningful sentences and articles related to business field, developing the skill to write descriptions of people like, famous entrepreneurs, business leaders and managers and places like business organizations and writing personal notes to colleagues and relatives. Speaking: Self introduction and introducing others, asking for and giving business information, inviting and thanking. Listening: Answering questions while listening to audio or video records – business oriented speeches, interviews and lectures.</p>				
Teaching and Learning Methods/Activities	Lectures, Group discussion, Task-based language learning, student centered learning and Content and Language Integrated Learning (CLIL), self-learning activities using LMS & Computer Assisted Language Learning (CALL).			
Evaluation	<p>Formative Assessment (In-course) 30%</p> <ul style="list-style-type: none"> – Four assessments will be conducted to evaluate each skill. – The assessment could be in any forms such as classroom assignment, take-home assignment, oral presentation and online assessment – Formative assessment will be considered for 400 marks (100 marks 			

	<p>for the assessment of each skill)</p> <ul style="list-style-type: none"> – The marks obtained will be converted into 30 % to be added with the final marks. <p>Summative Assessment 70%</p> <ul style="list-style-type: none"> – Duration of the question paper is of two hours consisting questions based mostly on skills like reading and writing along with selected grammatical components. – The number of questions and the marks allocated to each question may vary depending on the type of questions. – All the questions should be answered and the marks allocated for the final assessment is 100. – Marks obtained will be converted into 70 % to be added with the final marks.

Course Title	Business Mathematics and Statistics			
Course Code	BBAF 12013			
Credit Value	3			
Status	Level 1 / Semester II /Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	-	-	105
Aim				
The aim of the course unit is to provide the basic understanding of mathematical and statistical concepts, knowledge and techniques required for the business students.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Describe the basic application of mathematical concepts in business – Solve the business problems using matrix operations – Explain the concept and rules of differentiation – Recognize the application of differentiation in solving business problems – Explain the concept and rules of integration – Apply integration for business decisions – Explain the basic concepts of business statistics – Compute measures of central tendency and dispersions – Describe the basic concept of correlation analysis – Explain the functions of linear regression – Use the correlation and regression analysis in business decision making – Perform time series analysis to solve the business problems – Explain the concept of probability – Use probability distributions in business decisions – Apply the hypothesis testing concept in business decision making 				
Syllabus Contents				
Business Mathematics Introduction of mathematical concepts to the business: basic concepts and skills of algebra, importance and usage of mathematical concepts to solve the business problems; Matrix and its application: types of matrices, matrix operations, determinant, inverse of the matrix and solving business problems using matrix applications; Differential calculus: rules of differentiation, maxima and minima functions; Application of differentiation: profit maximization and cost minimization; Integral calculus: rules of integration, definite and indefinite integrals; Applications of integration: marginal revenue, marginal cost and total change in revenue Business Statistics Introduction to statistics and its business application: functions, importance, scope and limitations of statistics in business, types of statistics, types of variables, levels of measurement, population and sample, application of statistics in the business world; Measures of central tendency and dispersions: Properties and measurement of central tendency and dispersions - mean, median, mode, range, percentile and quartile deviation, variance and standard deviation; Correlation analysis: introduction, types of correlation, coefficient of correlation, coefficient of determination; Regression analysis: introduction, assumptions of underlying linear regression, confidence and prediction intervals, regression equation, multiple regression model, individual regression coefficients; Application of correlation and regression analysis in business: measuring, predicting relationships and apply them in business decision making; Time series analysis: components- trend, cyclical, seasonal variations and				

<p>irregular variations, and forecasting; Probability: approaches to assigning probability, rules of computing probabilities, permutation and combination; Probability distributions: defining probability distributions, mean, variance and standard deviation of a probability distribution, types of probability distributions and business applications of the probability distributions; Hypothesis testing: procedures for testing hypothesis, one tailed and two tailed test of significance, errors in hypothesis testing, testing for a population mean with a known population standard deviation and unknown population standard deviation.</p>	
<p>Teaching and Learning Methods/Activities</p>	<p>Lectures, tutorials, group discussions, class discussions, participatory learning activities, virtual learning, presentations, individual assignments, textbook assignments, library research on topics or problems, open textbook study, problem solving or case study, applying statistical techniques to class data.</p>
<p>Evaluation</p>	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks. – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration. – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory and contains 20 multiple choice questions for 20 marks. ○ Part II: It contains two parts namely Part A and Part B. Part A consists of three questions in business mathematics and Part B consists of four questions in business statistics. These questions may include several parts. Students are expected to answer four questions by selecting at least one question from each part. Total marks for this part is 80.
<p>Recommended Readings:</p> <ul style="list-style-type: none"> • Brechner, R., & Bergeman, G. (2019). <i>Contemporary mathematics for business and Consumers</i> (9th ed.). Course Title	Computer Based Information Management			
Course Code	BBAF 21043			
Credit Value	3			
Status	Level 2 / Semester I /Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	30	30	-	90
Aim				
The aim of this course unit is to provide specialised knowledge and skills in the design and development of databases for business information systems and to develop competencies on database management systems and its applications for business.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the terms database, database management system – Describe current technology trends in the data management and business information systems – List the users in the database management system – Identify three-level ANSI-SPARC database architecture – Explain data models – Outline the relational database design concepts – Provide the fundamental elements of relational database management systems – Draw entity relationship diagrams for various business systems. – Illustrate the use of entity relationship diagrams in the business analysis report – State the importance of the normalization in database design – Discuss the update anomalies in database systems – Apply the functional dependency concept in normalization – Classify the characteristics of the three normal forms – Employ normalization process up to third normal forms in the design of a database – Write and execute queries – Develop complex queries with the use of window functions – Apply client software to manage and fill a relational database – Prepare reports and dashboards to provide access for users to business-critical information – Construct databases on server platforms 				
Syllabus Content				
<p>Database management and business information system: introduction to current trend in database and database management system(DBMS), business challenges of an enterprise, importance of the database approach, DBMS environment, different user groups of DBMS;</p> <p>Database system architecture: three-Level ANSI-SPARC architecture, database Schema, data independency;</p> <p>Database design: types of Data Models: Hierarchical Model, Network Model, Entity-Relationship Model, Relational Model, Object-Oriented Data Model and Data modelling techniques;</p> <p>Entity relationship model: elements of Entity Relationship Diagram, Identify the integrity constraints (business rules) hold for a given problem, draw an entity relationship diagram using conceptual schema;</p> <p>Normalization technique: introduction to Normalization, update anomalies, differences between Normalized and Unnormalized format of data representation, define first, second, third Normal forms. Process of Normalization for a business problem;</p> <p>Query</p>				

languages(SQL): define Structured Query Languages (SQL), Data Definition Languages (DDL), Data Manipulation Languages (DML), Data Control Languages (DCL), query languages for create, retrieve, insert, update, sort, join, delete, filtering data in a database, writing queries with join tables, sub queries, views, create forms and reports using SQL; Database for large and small business and development: data accessibility, data/database administration, data warehousing, data mining, security, data recovery, contemporary, the internet database environment, Business Intelligent system and modern IT infrastructure to database systems.	
Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, virtual learning, presentations, individual assignments, case studies, and forum.
Evaluation	<p>Formative Assessment (In-course): 40%</p> <ul style="list-style-type: none"> – At least four assessments for 40 Marks – The assessments could be in the form of classroom assignment, Lab practical, take-home assignment, quizzes, presentations, and case studies. <p>Summative Assessment: (60%)</p> <p>Written examination</p> <ul style="list-style-type: none"> – Duration of the question paper is of three hours – Students are expected to answer five questions out of seven questions that may include several parts. – Total marks of written Examination obtained out of 100 will be converted for 60%. <p>Practical Examination</p> <ul style="list-style-type: none"> – Duration of the question paper is two hours – All questions should be answered. – The total marks of practical examination obtained out of 100 will be converted for 40%. <p>*Students should attend both examinations to complete the course unit</p>

Course Title	Business English IV			
Course Code	BBAD 22062			
Credit Value	2			
Status	Level 2 / Semester II /Compulsory			
UTEL Benchmark	6			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	30	15	-	55
Aim				
The aim of the course is to give general knowledge and understanding of the use of English in business situations and develop all the four skills of English Language.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> - Comprehend, organize, and retain written information related to business and administration. - Increase vocabulary through the study of word parts, use of context clues, and practice with a dictionary. - Extract key ideas and details of business texts, while listening - Demonstrate an understanding of more complex grammatical structures in speaking and writing that includes relative pronouns and reported speech - Demonstrate in different roles in a variety of simulated business contexts including preparing for and participating in meetings - Prepare PowerPoint presentations that include text, graphics, animation, and transitions. - Compose a range of business documents to include notices, agendas, minutes and reports - Formulate business letters with an emphasis on clarity and brevity. 				
Syllabus Content				
<p>Reading: Identifying main points and supporting details, determining audience and purpose, summarizing and responding to written Business English texts. Expanding academic and business vocabulary. Grammar: Using grammatical structures and punctuation appropriately in different types of business correspondence; Constructing active and passive voice sentences, combining sentences using relative and 'if' conditional clauses to connect ideas in business writing. Using indirect speech to report.</p> <p>Writing: Transferring information from charts, tables and graphs and write meaningful passages. Writing memos, e-mails and formal letters pertaining to business field. Writing reports and minutes of meetings using the appropriate format. Speaking: Communicating with each other using various communication strategies. Giving short speeches in formal and informal situations. Distinguishing the characteristics between good and bad presentations, developing presentation skills and doing presentations related to business topics using appropriate expressions. Listening: Answering questions giving details of lectures, announcements, conversations and news bulletins while listening to native and nonnative speakers</p>				

Teaching and Learning Methods/Activities	Lectures, Group discussion, Task-based language learning, student centered learning and Content and Language Integrated Learning (CLIL), self-learning activities using LMS & Computer Assisted Language Learning (CALL).
Evaluation	<p>Formative Assessment (In-course): 30%</p> <ul style="list-style-type: none"> – Four assessments will be conducted to evaluate each skill. – The assessment could be in any forms such as classroom assignment, take-home assignment, oral presentation and online assessment – Formative assessment will be considered for 400 marks (100 marks for the assessment of each skill) – The marks obtained will be converted into 30 % to be added with the final marks. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – Duration of the question paper is of two hours consisting questions based mostly on skills like reading and writing along with selected grammatical components. – The number of questions and the marks allocated to each question may vary depending on the type of questions. – All the questions should be answered and the marks allocated for the final assessment is 100. – Marks obtained will be converted into 70 % to be added with the final marks.

Level III & IV

Bachelor of Business
Administration Honours in
HRM

Department of Human Resource Management

Course Title	Quantitative Methods for Business			
Course Code	BBAH 31013			
Credit Value	3			
Status	Level 3 / Semester I /Core			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	-	-	105
Aim				
The aim of this course unit is to provide the knowledge in using quantitative methods and techniques for effective decisions-making; model formulation and applications that are used in solving business decision problems.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the role of quantitative methods in business decision making – Explain basic concepts of optimization, modelling and linear program modeling – Formulate linear programs – Solve the linear program model by using graphical and simplex method – Formulate transportation and assignment problems as mathematical programming model – Solve Transportation Models and Assignment Model – Construct an active network diagram – Calculate earliest and latest start and finishing times for activities – Determine the critical path(s) through a network – Explain mathematical concepts of analytical queuing models: arrival distribution, service-time distribution, queue discipline, and queuing behavior – Explain the three parts of a queuing system: the calling population, the queue itself, and the service facility – Apply main formulas of single-server queuing model (such as stationary probabilities, average waiting and system time, expected number of customers in the queue, etc.) – Identify activities connected with the inventory control – Calculate inventory control levels and EOQ – Explain how to adopt a systematic approach to decision-making under uncertainty. – Identify the sources of uncertainty behind strategic decisions – Illustrate how to integrate all steps by optimization and simulations to reduce the uncertainty 				
Syllabus Content				
Linear programming (LP): model formulation, graphical solution for two-variable problems, special cases in LP, the simplex method, sensitivity analysis; Transportation, transshipment and assignment problems: initial solution for transportation problem, optimal solution for the transportation problem, special cases in transportation problem, assignment problems with the hungarian method; Network analysis: PERT network, activity-on-node technique, activity completion time and variance estimation, beta probability distribution, critical path, probability of project completion, CPM, project crashing; Queuing models: characteristics of a queuing system, total expected cost and service level, Kendall notation, queuing models; Inventory control: inventory value, inventory control methods, inventory control system; Decision analysis: decision-making under certainty, decision-making under risk, decision-making under uncertainty, decision making techniques, decision tables, decision tress.				
Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, presentations, individual assignments			

<p>Evaluation</p>	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study, and debate. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 20 multiple choice questions for 20 marks ○ Part II: Students are expected to answer four questions out of five questions that may include several parts. Total marks for this part is 80.
<p>Recommended Readings</p> <ul style="list-style-type: none"> • Anderson, D. R., Sweeney, D. J., Williams, T. A., Camm, J. D., Cochran, J. J., Fry, M. J., & Ohlmann, J.W. Course Title	Workplace Learning and Development			
Course Code	BBAH 31023			
Credit Value	3			
Status	Level 3 / Semester I /Core			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	-	10	95
Aim				
The aim of the course unit is to provide an overall understanding of workplace learning and development that enables students to think of various methods and delivering strategies in fulfilling the shortage of knowledge and skills of employees to align with that of the organisation.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the key concepts of workplace learning and development – Differentiate the terms of training, learning and development – State the reasons for moving from training and development to learning and development – Discuss the different types of adult learning methods – Suggest the ways to motivate the adults to learn – Analyze the need for the learning and development in the workplace – Identify different learning and development methods in organisations – Evaluate the learning and development methods – Explain the concept of knowledge management and the knowledge management system life cycle – Relate knowledge creation and knowledge architecture – State the challenges in building knowledge management system – Describe the challenges of the ongoing approaches and trends in learning and development – Apply the fundamental learning and development concepts to local and global organisational settings 				
Syllabus Content				
<p>Learning and development in the work context: basic concepts, phenomena of workplace learning and development, the move from training and development to learning and development; Introduction to adult learning: knowledge, skills and attitudes- Bloom’s taxonomy, Kolb’s experiential learning cycle, Honey and Mumford’s learning style, sensory learning preferences, theory of competence, motivating adults to learn, organisational learning; Analyzing development needs: identifying the impact of changes, clarifying the standards, assessing the current position; Learning and development methods: action learning, apprenticeships, coaching, delegation, discussion board and groups, distance learning, e-learning, mentoring, networking, learning through case studies, on the job training, outdoor education, reflective practice, evaluation methods; Knowledge management: understanding the knowledge, knowledge management system life cycle, knowledge creation and knowledge architecture, challenges in building knowledge management system; Issues and new trends in learning and development: ongoing approaches and trends for learning and development, challenges in new tools and techniques for learning and development.</p>				
Teaching and Learning Methods/Activities	Lectures, tutorials, discussions, participatory learning activities, online learning activities, presentations, individual assignments, case studies and forum			
Evaluation	Formative assessment (In-course): 30% <ul style="list-style-type: none"> – At least three assessments for 30 Marks 			

	<ul style="list-style-type: none"> – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study, debate, role play <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 20 multiple choice questions for 20 marks ○ Part II: Students are expected to answer four questions out of seven questions that may include several parts. The total marks for this part is 80.
<p>Recommended Readings:</p> <ul style="list-style-type: none"> • Beevers, K., Rea, A. & Hayden, D. (2019). <i>Learning and Development Practice in the Workplace</i> (4th ed.). Course Title	Health, Safety and Benefits Management			
Course Code	BBAH 31033			
Credit Value	3			
Status	Level 3 / Semester I / Core			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	---	10	95
Aim				
The aim of the course unit is to provide knowledge in health, safety and benefits management of employees, apply these aspects in workplace.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the key terms in health, safety and benefits management – Explain the key principles and policies of health and safety in organisation in order to effectively manage Human resources – Outline the importance of health and safety management to all parties (employer employee and society) – Develop a framework of health and safety management including its components – Describe health and safety culture and safety performance – Explain the factors influencing safety culture – Show the methods to develop and communicate safety culture in organisation and train employees on safety – Identify internal and external influences and its impact on safety performance – Describe types, causes and prevention of accidents in organisation – State objectives, legal aspects, forms, processes and management of risk assessment – State sources, types and controlling methods of hazards – Identify the needs of benefits and services in an organisation – Describe types of employee benefits and services – Explain the meaning, importance and of ergonomics in workplace – Explain the Law and regulation related with health, safety and benefits management in Sri Lanka – Elaborate the contemporary issues in health, safety and benefits management 				
Syllabus Content				
<p>Introduction of health and safety management: Definition of key concepts, key principles, policies and importance of health, safety and benefits management in organisation: to the point of view of employees, employer and society as a whole. The framework for health and safety management: General framework, rights and responsibilities of employees and employer, Promoting health and safety culture: safety culture and safety performance, Human factors and their influence on safety performance, Human errors and violations, developing a positive health and safety culture, Health and safety communication, training on health and safety, internal and external influences on health and safety culture, Accidents: types, causes and prevention of accidents, Risk management: Assessment of risk, legal aspects and forms of risk assessment, The objectives of risk assessment process, risk assessment process, and Management of risk assessment, Hazards and control: types, causes, and management of hazards in workplace; Employee benefits and services: basics of employee benefits and services, Types of benefits and services, importance of benefits and services, employee assistance program; Ergonomics: meaning, benefits and importance of ergonomics, risk factors inherent in worker, task and environment and controlling risk factors; Legal consideration</p>				

on safety and health issues: introduction, laws related to health and safety in Sri Lanka, Factories Ordinance, Workmen Compensation Ordinance; Contemporary issues in health, safety and benefits management.	
Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, online learning activities, presentations, individual assignments, case studies and forum.
Evaluation	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study, debate, role play. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 20 multiple choice questions for 20 marks ○ Part II: Students are expected to answer four questions out of seven questions that may include several parts. The total marks for this part is 80.

Course Title	Labour Economics			
Course Code	BBAH 31082			
Credit Value	2			
Core/Elective	Level 3 / Semester I / Elective			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	30	---	5	65
Aim:				
The aim of the course unit is to provide an overall understanding of the fundamental theories, methods of analysis and applied aspects, which form the modern labour market economics.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Explain the key concepts and tools of labour economics – Identify the actions of key economic actors in the labour market – Analyze the interactions between aggregate economic forces – Evaluate the various outcomes of the labour market activities – Explain the importance of the investment on human capital – Identify the factors influencing wage determination within a firm – Analyse the impact of union activities in the labour market – Describe the impact of technological changes in the labour market – Identify the ways of income redistribution – Explain the relationship between employment protection and unemployment insurance 				
Syllabus Content				
<p>Overview of the labour market: the demand for labour, labour demand elasticity, frictions in the labour market, the decision to work; supply of labour to the economy, household production, the family, and the life cycle, compensating wage differentials and labour markets; Investments in human capital: education and training, local worker mobility, turnover, pay and productivity; Wage determination within the firm: gender, race, and ethnicity in the labour market; The impact of union activities in the labour market: unemployment, inequality in earnings, the labour-market effects of international trade and production sharing; Technological progress, unemployment and inequality: facts about technological progress, labour productivity and unemployment, the capitalization effects, creative destruction, endogenous technical progress; Income redistribution: taxation and transfers, the minimum wage; Insurance policies: unemployment insurance, employment protection, the interplay between employment protection and unemployment insurance.</p>				
Teaching and Learning Methods/Activities	Lectures, classroom discussion, presentation, individual and group assignments, case studies and forum.			
Evaluation	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, and case study. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of Two hour duration – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory. Course Title	Dissertation in Human Resource Management
Course Code	BBAH 42018
Credit Value	8
Status	Level 4 / Semester II / Core
Notional hours	800
Aim:	
The aim of the course unit is to provide students with an opportunity to undertake an independent study on HR-related areas under the guidance of an academic supervisor assigned by the department.	
Intended Learning Outcomes	
<ul style="list-style-type: none"> – Identify a research problem as a basis for conducting the study – Evaluate the literature critically for identifying the gaps – Construct an appropriate research design for undertaking the study – Apply the appropriate data collection method for garnering the data – Analyze data using appropriate software – Interpret the results of the study – Use the recommended referencing style in citing sources – Apply the principles of ethical conduct and integrity in conducting research. – Demonstrate professionalism in presenting the findings of the research – Prepare the project report at high quality 	
Evaluation	<p>The students should submit a dissertation and face a viva-voce. The dissertation should be prepared adhering to the guidelines approved by the faculty/ department.</p> <ul style="list-style-type: none"> • Interim presentation -10 % • Dissertation-70 % • Viva-voce -20 %

Course Title	Internship in Human Resource Management
Course Code	BBAH 42026
Credit Value	6
Status	Level 4 / Semester II / Core
Notional hours	600
Aim:	
The aim of the course unit is to provide students with an opportunity to gain hands-on experience of the practices of HRM in the real world of work and to apply the knowledge gained from classroom learning to a work setting.	
Intended Learning Outcomes	
<ul style="list-style-type: none"> – Relate the theoretical knowledge and skills gained during the study programme to practice in the workplace – Develop interpersonal skills, problem-solving ability and communication skills – Promote networking with industry/organisations – Demonstrate ethical and professional conduct in performing the tasks and in dealing with different people – Propose solutions to the HR-related issues identified in the workplace 	
Evaluation	<p>At the end of the internship, students should submit a high-quality report including the experience gained, requirements for additional skills and propose solution to the HR-related issues identified during the internship. The report should be prepared adhering to the guidelines approved by the faculty/ department.</p> <ul style="list-style-type: none"> • Logbook maintenance 15 % • Mentor report 20 % • Internship report 40% • Viva-voce 25 %

Department of Marketing

DEPARTMENT OF MARKETING

Introduction

The Department of Marketing is coming under the Faculty of Management Studies and Commerce of the University of Jaffna, Sri Lanka as one of the five departments. The faculty get the students allocated by the University Grants Commission (UGC) for a single degree programme named as Bachelor of Business Administration, with avenues of respective specialisation under each department. As such, department of marketing initiated its activities in early 2011. Averagely, 40 – 50 students enrolled every year to read specialization in Marketing. During their third and fourth year of study. They are being coached and trained in various marketing related course units. During the fourth year second semester students have to go for internship programme in their preferred institutions for marketing related internship and almost all of them are being offered permanency in those organisations at the end of their internship because of their performance. At present, we have ten permanent academic cadres where all are filled. All of them are professionally qualified in the field of marketing. Very friendly behaviour with easily approachable staff is the main strength of the department. Academic staff used to adopt creative types of approaches in addition to their conventional teaching during the third and fourth years of study. These methods were appreciated and welcomed by the students, these includes field trips, factory visits, poster presentations, creation of advertisements, juice bars fairs to adopt creative strategies, individual as well group presentations, etc. Blended teaching method was also adopted by the staff from 2017 which made student – centred teaching and learning easier during Covid 19 crisis. Students from Department of Marketing are very creative and talented. This is clearly proven by the activities and competitions they take part in. One among the top five finalists at the ADCON -2019 competition conducted by the University of Ruhuna, was the team from the Department of Marketing, University of Jaffna, Sri Lanka. This was a remarkable achievement in the department history. In addition, Marketing Forum, a platform, which provides ample opportunities to build their knowledge and skills through various programmes. With the initiation made by Mr. V. Kumaradeepan, a senior academic of the department, the Sri Lanka Institute of Marketing [SLIM] step forwarded to sign an MoU with the department in the year 2021. This MoU has two offers, one is the Gold Medal to the best performing student who scores the highest Overall Grade Point Average [OGPA]. The other offer is the full scholarship to read the Postgraduate Diploma in Marketing with SLIM for the gold medalist.

a. Bachelor of Business Administration Honours in Marketing

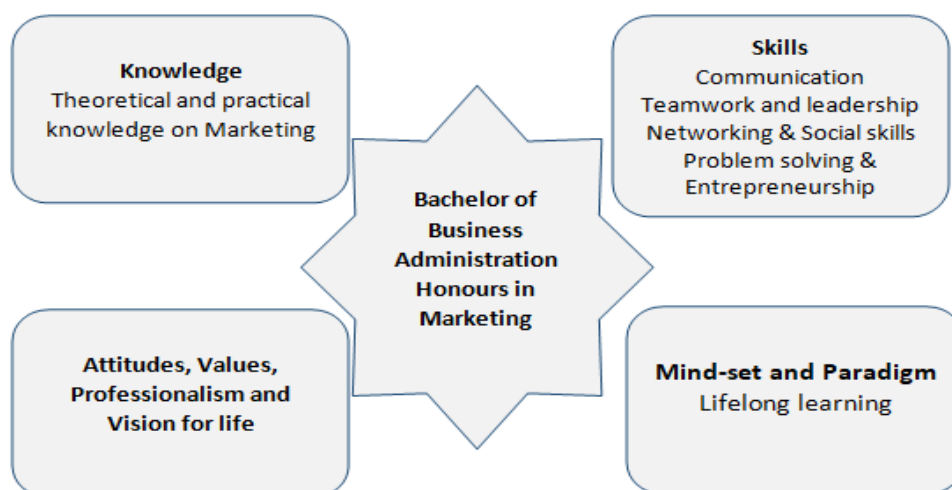

(i) Programme Learning Outcomes (PLOs)

Upon the successful completion of the Bachelor of Business Administration Honours in marketing, the graduates are expected to:

- PLO 01: Discover advanced knowledge concerning the core aspects of marketing
- PLO 02: Apply the basic concepts and theories of marketing and its sub-components
- PLO 03: Communicate appropriately and effectively with due concern for the implications of management decisions and other marketing activities.
- PLO 04: Practice teamwork and leadership skills in working with peers for projects, programmes, and various marketing assignments.
- PLO 05: Exhibit innovative and creative ideas.
- PLO 06: Develop strategies that empower business communities as well as small entrepreneurs.
- PLO 07: Utilise IT and respective software literacy to enhance performance.
- PLO 08: Demonstrate the ability to engage responsibly in the economic, social, and cultural environments to advance individual, community, and global wellbeing.
- PLO 09: Demonstrate adaptability to new trends that emerge in response to the sudden natural and artificial changes in the political, legal and ethical environments of a business.
- PLO 10: Advance their aptitudes to identify, evaluate, and respond appropriately to professional, ethical, and regulatory issues in marketing.
- PLO 11: Practice professional ethics and ensure accountability in decision making.
- PLO 12: Display critical thinking, lifelong learning and interpersonal skills.

(ii) Graduate profile

The aim of the Bachelor of Business Administration Honours in Marketing Degree Programme is to produce graduates with a broad knowledge in theory, practice and methodology of disciplines that enable them to bear responsibility in a professional environment.

Level I & II

Common Programme

Faculty of Management Studies and Commerce

Course Title	Principles of Management			
Course Code	BBAH 11013			
Credit Value	3			
Status	Level 1 / Semester I /Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	---	10	95
Aim

Course Title	Sri Lankan Business Environment			
Course Code	BBAM 11023			
Credit Value	03			
Status	Level 1 / Semester I / Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	---	15	90
Aim				
The aim of the course unit is to analyze the overall business environment in Sri Lanka to evaluate its various components, and their influences on business decision making.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the concepts of business, business environment with sub-components – Discuss the nature of the business environment in Sri Lanka – Compare the micro and macro level business environmental factors – Categorise the external environmental factors – Analyse strength, weaknesses, opportunities, and threats (SWOT) of a business – Describe the role of small enterprises in the economic development of Sri Lanka – Analyse the problems of small-scale enterprises – List out the corrective measures of industrial sickness – Differentiate international business from domestic business – Identify factors that affect business decisions – Discuss the role of corporate social responsibility (CSR) in business practice – Outline the Sri Lanka's sustainable development of goals, influence on business decision-making – Examine factors encountered for crises in a business and overcoming from it – Explain the need for privatization, globalization and business decision-making – Create a crisis response plan for a selected business 				
Syllabus Content				
<p>Introduction to business environment: introduction, meaning and concept of business, characteristics of business, components, micro and macro environment, importance of business environment, type of businesses; Internal and external environments of Sri Lanka: micro and macro level factors, economic factors, socio cultural environmental factors, political environmental, financial environment, legal environment, technological factors, environmental factors, SWOT analysis; Small enterprise and village industries: industrial policies, definition and characteristics of small enterprises, relationship between small and large enterprises, objectives and scope of small enterprises, role of small enterprise in economic development and problems of small-scale enterprises, industrial sickness, warning signals of Industrial sickness, external and internal causes of industrial sickness, and corrective measures; International business environment and Sri Lankan businesses: introduction, levels of economic integration/trading blocs, effects of economic integration, major regional trading blocs, commodity agreement, World Trade Organization [WTO], WTO and Sri Lanka, sustainability of businesses; Corporate Social Responsibility: need for social responsibility of business, social responsibility of business towards different groups, barriers to social responsibility, social responsibility of business in Sri Lanka; Managing changes in business environment: impact of Sri Lanka's industrial policy on economic reforms, sustainable development</p>				

goals and trade policies, privatization, and globalization and their impacts, crisis management and contingency planning by considering previous experiences.	
Teaching and Learning Methods/Activities	Lectures, student report by individuals and groups, discussion forum, collecting business news, diary writing, making of posters by students, problem solving of business case studies, construction of scrap books, studying local business history.
Evaluation	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study, debate, role play. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of three-hour duration. – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains a case study for 40 Marks. ○ Part II: Students are expected to answer four questions out of seven questions that may include several parts. Total marks for this part is 60.

Course Title	Financial Accounting I			
Course Code	BBAA11033			
Credit Value	3			
Status	Level 1/ Semester I/ Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	-	-	105
Aim				
The aim of this course unit is to provide knowledge in financial accounting and practices in order to prepare financial statements of an organisation.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Describe the conceptual framework of financial reporting – Identify the elements and components of financial statements – Explain the qualitative characteristics of financial information – Explain the underlying assumptions of financial reporting – Identify specific requirements in the preparation and presentation of financial statements – Identify the basic elements of investment account – Explain accounting entries for purchase and sale of investment – Prepare investment accounts using FIFO and weighted average method – Identify the purpose of accounting standards – Define the terms in the prescribed accounting standards – Explain the accounting treatments given in the standards – List the disclosure requirements of the accounting standards – Explain the purpose of a partnership – Prepare financial statements for a partnership – Prepare a set of financial statements for dissolution and conversion of partnerships into limited liability companies 				
Syllabus Content				
Conceptual framework for financial reporting: definition of conceptual framework, elements and components of financial statements, qualitative characteristics of financial information, underlying assumptions of financial reporting, recognition and derecognition, measurement; Investment accounts: purchase and sale of investments, cum-interest/cum-dividend, ex-interest/ex-dividend, investment accounts using FIFO and weighted average method; Sri Lanka accounting standards and Sri Lanka financial reporting standards: presentation of financial statement, inventory, property, plant and equipment, Financial Statements for a partnership: purpose of partnership, current account and capital account, financial statements for a partnership, dissolution and conversion of partnerships into limited liability companies.				
Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, presentations, individual assignments			
Evaluation	Formative assessment (In-course): 30% <ul style="list-style-type: none"> – At least three assessments for 30 Marks. 			

	<ul style="list-style-type: none"> – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study and debate. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration. – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 20 multiple choice questions for 20 Marks. ○ Part II Students are expected to answer all four questions that may include several parts. Total marks for this part is 80.

Course Title	Information Technology			
Course Code	BBAF 11052			
Credit Value	2			
Status	Level 1 / Semester 1 /Compulsory			
Notional hours	Theory	Practical	Field/Industrial visits	Independent learning hours
	20	30	-	50
Aim				
The aim of this course unit is to provide knowledge and skills required to apply information technology to business.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the terms data, information, Information Technology (IT), and Information and Communication Technology (ICT) – Discuss the issues, ethical use of IT and ergonomics in current business world – Assess the uses of information technology in business and real-life environments – Identify the physical components of computer system and its functions – Classify the logical components of computer system and its uses – Describe data communication and it's modes and elements – Explain basic networking principles and security measures to organise a local area network – Recognize current Internet and web technologies for a business environment – Operate on latest graphical environment of computer system – Choose software applications for documentation, reporting and analyses related to businesses. – Evaluate the usage of business applications in different cloud platforms 				
Syllabus Content				
<p>Introduction to Information Technology: definitions of data and information, introduction and basic elements of Information technology, uses of IT in business, health issues, ergonomics & the environment, cyber ethics, threats, safeguarding computers and communications systems;</p> <p>Computer system: physical components and logical components of computer system;</p> <p>Data communication and networks: data communication basic concepts, introduction to computer networks, components of computer networks, Open System Interconnection (OSI) model, data transmission media, IP addressing and configuration, introduction to network security;</p> <p>Internet and World Wide Web: internet and web technologies, cloud computing, social media, e-commerce and internet services;</p> <p>Applications for business: Working on graphical user interface (GUI) environment of computer system, Create and managing different types of files, organizing folders, typing in Unicode font for local language, working with applications for business documentations, reports and presentation, working with spreadsheet applications for business calculations and analyses;</p> <p>Cloud applications for business and organizational environment: working with cloud applications for documentation, spreadsheet analysis, presentation, forms, calendar and meeting and web site design, Create, manage and share files in cloud.</p>				
Teaching and Learning Methods/Activities	Lectures, virtual learning, practical, tutorials, group discussions, participatory learning activities, presentations, individual assignments, case studies and forum.			
Evaluation	Formative Assessment (In-course): 40% <ul style="list-style-type: none"> – At least four assessments for 40 Marks 			

	<ul style="list-style-type: none"> – The assessments could in the form of classroom assignment, Lab practical, take-home assignment, quizzes, presentations, and case studies. <p>Summative Assessment: 60%</p> <p>Written Examination</p> <ul style="list-style-type: none"> – End of course written examination is of two-hour duration – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 25 multiple choice questions for 25 marks. ○ Part II: Students are expected to answer three questions out of five questions that may include several parts. Total marks for this part is 75. ○ The total marks of written examination obtained out of 100 will be converted into 60%. <p>Practical Examination:</p> <ul style="list-style-type: none"> – Duration of the examination is two-hour duration – All questions should be answered. – The total marks of practical examination obtained out of 100 will be converted into 40%. <p>*Students should attend both examinations to complete the course unit</p>

Course Title	Business English I			
Course Code	BBAD 11062			
Credit Value	2			
Status	Level 1/ Semester I /Compulsory			
UTEL Benchmark	5			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	30	15	-	55
Aim				
The aim of the course is to provide opportunities for the learners to develop English Language skills with a focus on business contexts and environments.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Respond to gist and details in a range of simple and moderately complex texts related to business and administration. – Use contextual, structural, and morphological clues to deduce meaning of unfamiliar words and phrases. – Interact in Face to Face social conversations related mostly on personal information. – Demonstrate the ability to give and get information using a range of functional language. – Construct simple sentences incorporating appropriate mechanics and basic grammar such as parts of speech, subject-verb agreement and passivation. – Formulate appropriate questions and responses related to real life situations. – Identify the major and minor details of conversations, short lectures and news items. – Write personal notes to convey various messages. – Produce multiple drafts of different types of paragraphs describing people, places and objects related to business field. 				
Syllabus Content				
<p>Reading: Identifying the main idea of current or business related passages adopted from business magazines, newspapers and books, recognizing the meanings of new words, answering questions based on the passages. Grammar: Recognizing the forms, functions and uses of present, past and future tenses. Positive, negative and interrogative forms in all the tenses and their communicative functions, usage of prepositions and conjunctions, differentiating the active voice sentences and passive voice sentences and transformation of the sentences. Writing: Writing meaningful sentences and articles related to business field, developing the skill to write descriptions of people like, famous entrepreneurs, business leaders and managers and places like business organizations and writing personal notes to colleagues and relatives. Speaking: Self introduction and introducing others, asking for and giving business information, inviting and thanking. Listening: Answering questions while listening to audio or video records – business oriented speeches, interviews and lectures.</p>				
Teaching and Learning Methods/Activities	Lectures, Group discussion, Task-based language learning, student centered learning and Content and Language Integrated Learning (CLIL), self-learning activities using LMS & Computer Assisted Language Learning (CALL).			
Evaluation	<p>Formative Assessment (In-course) 30%</p> <ul style="list-style-type: none"> – Four assessments will be conducted to evaluate each skill. – The assessment could be in any forms such as classroom assignment, take-home assignment, oral presentation and online assessment – Formative assessment will be considered for 400 marks (100 marks 			

	<p>for the assessment of each skill)</p> <ul style="list-style-type: none"> – The marks obtained will be converted into 30 % to be added with the final marks. <p>Summative Assessment 70%</p> <ul style="list-style-type: none"> – Duration of the question paper is of two hours consisting questions based mostly on skills like reading and writing along with selected grammatical components. – The number of questions and the marks allocated to each question may vary depending on the type of questions. – All the questions should be answered and the marks allocated for the final assessment is 100. – Marks obtained will be converted into 70 % to be added with the final marks.

Course Title	Business Mathematics and Statistics			
Course Code	BBAF 12013			
Credit Value	3			
Status	Level 1 / Semester II /Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	-	-	105
Aim				
The aim of the course unit is to provide the basic understanding of mathematical and statistical concepts, knowledge and techniques required for the business students.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Describe the basic application of mathematical concepts in business – Solve the business problems using matrix operations – Explain the concept and rules of differentiation – Recognize the application of differentiation in solving business problems – Explain the concept and rules of integration – Apply integration for business decisions – Explain the basic concepts of business statistics – Compute measures of central tendency and dispersions – Describe the basic concept of correlation analysis – Explain the functions of linear regression – Use the correlation and regression analysis in business decision making – Perform time series analysis to solve the business problems – Explain the concept of probability – Use probability distributions in business decisions – Apply the hypothesis testing concept in business decision making 				
Syllabus Contents				
Business Mathematics Introduction of mathematical concepts to the business: basic concepts and skills of algebra, importance and usage of mathematical concepts to solve the business problems; Matrix and its application: types of matrices, matrix operations, determinant, inverse of the matrix and solving business problems using matrix applications; Differential calculus: rules of differentiation, maxima and minima functions; Application of differentiation: profit maximization and cost minimization; Integral calculus: rules of integration, definite and indefinite integrals; Applications of integration: marginal revenue, marginal cost and total change in revenue Business Statistics Introduction to statistics and its business application: functions, importance, scope and limitations of statistics in business, types of statistics, types of variables, levels of measurement, population and sample, application of statistics in the business world; Measures of central tendency and dispersions: Properties and measurement of central tendency and dispersions - mean, median, mode, range, percentile and quartile deviation, variance and standard deviation; Correlation analysis: introduction, types of correlation, coefficient of correlation, coefficient of determination; Regression analysis: introduction, assumptions of underlying linear regression, confidence and prediction intervals, regression equation, multiple regression model, individual regression coefficients; Application of correlation and regression analysis in business: measuring, predicting relationships and apply them in business decision making; Time series analysis: components- trend, cyclical, seasonal variations and				

<p>irregular variations, and forecasting; Probability: approaches to assigning probability, rules of computing probabilities, permutation and combination; Probability distributions: defining probability distributions, mean, variance and standard deviation of a probability distribution, types of probability distributions and business applications of the probability distributions; Hypothesis testing: procedures for testing hypothesis, one tailed and two tailed test of significance, errors in hypothesis testing, testing for a population mean with a known population standard deviation and unknown population standard deviation.</p>	
<p>Teaching and Learning Methods/Activities</p>	<p>Lectures, tutorials, group discussions, class discussions, participatory learning activities, virtual learning, presentations, individual assignments, textbook assignments, library research on topics or problems, open textbook study, problem solving or case study, applying statistical techniques to class data.</p>
<p>Evaluation</p>	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks. – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration. – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory and contains 20 multiple choice questions for 20 marks. ○ Part II: It contains two parts namely Part A and Part B. Part A consists of three questions in business mathematics and Part B consists of four questions in business statistics. These questions may include several parts. Students are expected to answer four questions by selecting at least one question from each part. Total marks for this part is 80.
<p>Recommended Readings:</p> <ul style="list-style-type: none"> • Brechner, R., & Bergeman, G. (2019). <i>Contemporary mathematics for business and Consumers</i> (9th ed.). Course Title	Business Economics			
Course Code	BBAH 12023			
Credit Value	3			
Status	Level 1 / Semester II /Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	---	10	95
Aim				
The aim of the course unit is to provide knowledge of economic theories and principles to address various economic issues and apply the knowledge in business decision-making.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the terms economics, microeconomics and macroeconomics – Relate the concepts of scarcity, choice and opportunity cost – Classify the different economic systems – Describe the demand and supply theories and market equilibrium – Explain the utility theory and indifference curve analysis – Derive the demand curve using indifference curve – Explain price theory and price elasticity of demand – Illustrate the relationship between various types of costs in the short and long run – Describe production function, stages of production and isoquants – Interpret the law of diminishing marginal return and marginal rate of substitution – Explain the different market structures – State major macroeconomic objectives of a government – Describe the approaches to national income accounting – Interpret the aggregate demand and aggregate supply model – Explain the types of unemployment and its consequences – Explain how monetary policy impacts interest rates and aggregate demand – Explain how appreciating or depreciating currency affects exchange rates – Describe the Fiscal policy and Monetary policy of Sri Lankan economy 				
Syllabus Content				
<p>Introduction to microeconomics: definition of the terms economics, microeconomics and macroeconomics, scarcity and opportunity costs, production possibilities frontier, various economic systems; Theory of demand and supply: utility theory and indifference curve analysis, determinants of demand and supply, factor market for labour, general equilibrium, price theory, Cost theory: meaning, types of cost, relationship between total, fixed and variable costs, marginal cost, comparing short run and long run costs; Production theory: meaning, production function, stages of production, law of diminishing return, isoquants, marginal rate of substitution; Market structures: perfect competition, monopoly, monopolistic competition, oligopoly, duopoly; Introduction to macroeconomics: Importance of studying macroeconomics, government macroeconomic policy objectives, National income accounting: aspects of national income accounting, three approaches to national income accounting; Macroeconomic Theory: The Keynesian approach, aggregate demand and supply, business cycle, Inflation and unemployment: causes and consequences of inflation and unemployment, The Philip curve, Macroeconomic policy: fiscal policy, monetary theory, supply side economic policies, IS-LM equilibrium and effect of fiscal and monetary policies, The foreign exchange market: foreign exchange markets, influences on exchange rates, government policy on exchange rates, The Balance of payments: the nature of the</p>				

balance of payments, surplus and deficit in the current account, rectifying current account deficits, The J-curve effects, globalization	
Teaching and Learning Methods/Activities	Lectures, tutorials, discussions, online learning activities, presentations, individual assignments, case studies, forum and debate
Evaluation	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study, debate, role play. <p>Summative Assessment:70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration – Question paper contains three parts <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 20 multiple choice questions for 20 marks ○ Part II: It contains questions in Microeconomics. Students are expected to answer two questions out of four questions. Total marks for this part is 40. ○ Part III: It contains questions in Macroeconomics. Students are expected to answer two questions out of four questions. Total marks for this part is 40.

	20	30	-	50
Aim				
The aim of this course unit is to provide knowledge and skills required to apply information technology to business.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the terms data, information, Information Technology (IT), and Information and Communication Technology (ICT) – Discuss the issues, ethical use of IT and ergonomics in current business world – Assess the uses of information technology in business and real-life environments – Identify the physical components of computer system and its functions – Classify the logical components of computer system and its uses – Describe data communication and it's modes and elements – Explain basic networking principles and security measures to organise a local area network – Recognize current Internet and web technologies for a business environment – Operate on latest graphical environment of computer system – Choose software applications for documentation, reporting and analyses related to businesses. – Evaluate the usage of business applications in different cloud platforms 				
Syllabus Content				
<p>Introduction to Information Technology: definitions of data and information, introduction and basic elements of Information technology, uses of IT in business, health issues, ergonomics & the environment, cyber ethics, threats, safeguarding computers and communications systems; Computer system: physical components and logical components of computer system; Data communication and networks: data communication basic concepts, introduction to computer networks, components of computer networks, Open System Interconnection (OSI) model, data transmission media, IP addressing and configuration, introduction to network security; Internet and World Wide Web: internet and web technologies, cloud computing, social media, e-commerce and internet services; Applications for business: Working on graphical user interface (GUI) environment of computer system, Create and managing different types of files, organizing folders, typing in Unicode font for local language, working with applications for business documentations, reports and presentation, working with spreadsheet applications for business calculations and analyses; Cloud applications for business and organizational environment: working with cloud applications for documentation, spreadsheet analysis, presentation, forms, calendar and meeting and web site design, Create, manage and share files in cloud.</p>				
Teaching and Learning Methods/Activities	Lectures, virtual learning, practical, tutorials, group discussions, participatory learning activities, presentations, individual assignments, case studies and forum.			
Evaluation	Formative Assessment (In-course): 40% <ul style="list-style-type: none"> – At least four assessments for 40 Marks 			

	<ul style="list-style-type: none"> – The assessments could in the form of classroom assignment, Lab practical, take-home assignment, quizzes, presentations, and case studies. <p>Summative Assessment: 60%</p> <p>Written Examination</p> <ul style="list-style-type: none"> – End of course written examination is of two-hour duration – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 25 multiple choice questions for 25 marks. ○ Part II: Students are expected to answer three questions out of five questions that may include several parts. Total marks for this part is 75. ○ The total marks of written examination obtained out of 100 will be converted into 60%. <p>Practical Examination:</p> <ul style="list-style-type: none"> – Duration of the examination is two-hour duration – All questions should be answered. – The total marks of practical examination obtained out of 100 will be converted into 40%. <p>*Students should attend both examinations to complete the course unit</p>

Course Title	Business English I			
Course Code	BBAD 11062			
Credit Value	2			
Status	Level 1/ Semester I /Compulsory			
UTEL Benchmark	5			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	30	15	-	55
Aim				
The aim of the course is to provide opportunities for the learners to develop English Language skills with a focus on business contexts and environments.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Respond to gist and details in a range of simple and moderately complex texts related to business and administration. – Use contextual, structural, and morphological clues to deduce meaning of unfamiliar words and phrases. – Interact in Face to Face social conversations related mostly on personal information. – Demonstrate the ability to give and get information using a range of functional language. – Construct simple sentences incorporating appropriate mechanics and basic grammar such as parts of speech, subject-verb agreement and passivation. – Formulate appropriate questions and responses related to real life situations. – Identify the major and minor details of conversations, short lectures and news items. – Write personal notes to convey various messages. – Produce multiple drafts of different types of paragraphs describing people, places and objects related to business field. 				
Syllabus Content				
<p>Reading: Identifying the main idea of current or business related passages adopted from business magazines, newspapers and books, recognizing the meanings of new words, answering questions based on the passages. Grammar: Recognizing the forms, functions and uses of present, past and future tenses. Positive, negative and interrogative forms in all the tenses and their communicative functions, usage of prepositions and conjunctions, differentiating the active voice sentences and passive voice sentences and transformation of the sentences. Writing: Writing meaningful sentences and articles related to business field, developing the skill to write descriptions of people like, famous entrepreneurs, business leaders and managers and places like business organizations and writing personal notes to colleagues and relatives. Speaking: Self introduction and introducing others, asking for and giving business information, inviting and thanking. Listening: Answering questions while listening to audio or video records – business oriented speeches, interviews and lectures.</p>				
Teaching and Learning Methods/Activities	Lectures, Group discussion, Task-based language learning, student centered learning and Content and Language Integrated Learning (CLIL), self-learning activities using LMS & Computer Assisted Language Learning (CALL).			
Evaluation	<p>Formative Assessment (In-course) 30%</p> <ul style="list-style-type: none"> – Four assessments will be conducted to evaluate each skill. – The assessment could be in any forms such as classroom assignment, take-home assignment, oral presentation and online assessment – Formative assessment will be considered for 400 marks (100 marks 			

	<p>for the assessment of each skill)</p> <ul style="list-style-type: none"> – The marks obtained will be converted into 30 % to be added with the final marks. <p>Summative Assessment 70%</p> <ul style="list-style-type: none"> – Duration of the question paper is of two hours consisting questions based mostly on skills like reading and writing along with selected grammatical components. – The number of questions and the marks allocated to each question may vary depending on the type of questions. – All the questions should be answered and the marks allocated for the final assessment is 100. – Marks obtained will be converted into 70 % to be added with the final marks.

Course Title	Business Mathematics and Statistics			
Course Code	BBAF 12013			
Credit Value	3			
Status	Level 1 / Semester II /Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	-	-	105
Aim				
The aim of the course unit is to provide the basic understanding of mathematical and statistical concepts, knowledge and techniques required for the business students.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Describe the basic application of mathematical concepts in business – Solve the business problems using matrix operations – Explain the concept and rules of differentiation – Recognize the application of differentiation in solving business problems – Explain the concept and rules of integration – Apply integration for business decisions – Explain the basic concepts of business statistics – Compute measures of central tendency and dispersions – Describe the basic concept of correlation analysis – Explain the functions of linear regression – Use the correlation and regression analysis in business decision making – Perform time series analysis to solve the business problems – Explain the concept of probability – Use probability distributions in business decisions – Apply the hypothesis testing concept in business decision making 				
Syllabus Contents				
Business Mathematics Introduction of mathematical concepts to the business: basic concepts and skills of algebra, importance and usage of mathematical concepts to solve the business problems; Matrix and its application: types of matrices, matrix operations, determinant, inverse of the matrix and solving business problems using matrix applications; Differential calculus: rules of differentiation, maxima and minima functions; Application of differentiation: profit maximization and cost minimization; Integral calculus: rules of integration, definite and indefinite integrals; Applications of integration: marginal revenue, marginal cost and total change in revenue Business Statistics Introduction to statistics and its business application: functions, importance, scope and limitations of statistics in business, types of statistics, types of variables, levels of measurement, population and sample, application of statistics in the business world; Measures of central tendency and dispersions: Properties and measurement of central tendency and dispersions - mean, median, mode, range, percentile and quartile deviation, variance and standard deviation; Correlation analysis: introduction, types of correlation, coefficient of correlation, coefficient of determination; Regression analysis: introduction, assumptions of underlying linear regression, confidence and prediction intervals, regression equation, multiple regression model, individual regression coefficients; Application of correlation and regression analysis in business: measuring, predicting relationships and apply them in business decision making; Time series analysis: components- trend, cyclical, seasonal variations and				

<p>irregular variations, and forecasting; Probability: approaches to assigning probability, rules of computing probabilities, permutation and combination; Probability distributions: defining probability distributions, mean, variance and standard deviation of a probability distribution, types of probability distributions and business applications of the probability distributions; Hypothesis testing: procedures for testing hypothesis, one tailed and two tailed test of significance, errors in hypothesis testing, testing for a population mean with a known population standard deviation and unknown population standard deviation.</p>	
<p>Teaching and Learning Methods/Activities</p>	<p>Lectures, tutorials, group discussions, class discussions, participatory learning activities, virtual learning, presentations, individual assignments, textbook assignments, library research on topics or problems, open textbook study, problem solving or case study, applying statistical techniques to class data.</p>
<p>Evaluation</p>	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks. – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration. – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory and contains 20 multiple choice questions for 20 marks. ○ Part II: It contains two parts namely Part A and Part B. Part A consists of three questions in business mathematics and Part B consists of four questions in business statistics. These questions may include several parts. Students are expected to answer four questions by selecting at least one question from each part. Total marks for this part is 80.
<p>Recommended Readings:</p> <ul style="list-style-type: none"> • Brechner, R., & Bergeman, G. (2019). <i>Contemporary mathematics for business and Consumers</i> (9th ed.). Course Title	Business Economics			
Course Code	BBAH 12023			
Credit Value	3			
Status	Level 1 / Semester II /Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	---	10	95
Aim				
The aim of the course unit is to provide knowledge of economic theories and principles to address various economic issues and apply the knowledge in business decision-making.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the terms economics, microeconomics and macroeconomics – Relate the concepts of scarcity, choice and opportunity cost – Classify the different economic systems – Describe the demand and supply theories and market equilibrium – Explain the utility theory and indifference curve analysis – Derive the demand curve using indifference curve – Explain price theory and price elasticity of demand – Illustrate the relationship between various types of costs in the short and long run – Describe production function, stages of production and isoquants – Interpret the law of diminishing marginal return and marginal rate of substitution – Explain the different market structures – State major macroeconomic objectives of a government – Describe the approaches to national income accounting – Interpret the aggregate demand and aggregate supply model – Explain the types of unemployment and its consequences – Explain how monetary policy impacts interest rates and aggregate demand – Explain how appreciating or depreciating currency affects exchange rates – Describe the Fiscal policy and Monetary policy of Sri Lankan economy 				
Syllabus Content				
<p>Introduction to microeconomics: definition of the terms economics, microeconomics and macroeconomics, scarcity and opportunity costs, production possibilities frontier, various economic systems; Theory of demand and supply: utility theory and indifference curve analysis, determinants of demand and supply, factor market for labour, general equilibrium, price theory, Cost theory: meaning, types of cost, relationship between total, fixed and variable costs, marginal cost, comparing short run and long run costs; Production theory: meaning, production function, stages of production, law of diminishing return, isoquants, marginal rate of substitution; Market structures: perfect competition, monopoly, monopolistic competition, oligopoly, duopoly; Introduction to macroeconomics: Importance of studying macroeconomics, government macroeconomic policy objectives, National income accounting: aspects of national income accounting, three approaches to national income accounting; Macroeconomic Theory: The Keynesian approach, aggregate demand and supply, business cycle, Inflation and unemployment: causes and consequences of inflation and unemployment, The Philip curve, Macroeconomic policy: fiscal policy, monetary theory, supply side economic policies, IS-LM equilibrium and effect of fiscal and monetary policies, The foreign exchange market: foreign exchange markets, influences on exchange rates, government policy on exchange rates, The Balance of payments: the nature of the</p>				

balance of payments, surplus and deficit in the current account, rectifying current account deficits, The J-curve effects, globalization	
Teaching and Learning Methods/Activities	Lectures, tutorials, discussions, online learning activities, presentations, individual assignments, case studies, forum and debate
Evaluation	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks – The assessments could take any forms such as classroom assignment, take-home assignment, quiz, presentations, case study, debate, role play. <p>Summative Assessment:70%</p> <ul style="list-style-type: none"> – End of course written examination is of three hour duration – Question paper contains three parts <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 20 multiple choice questions for 20 marks ○ Part II: It contains questions in Microeconomics. Students are expected to answer two questions out of four questions. Total marks for this part is 40. ○ Part III: It contains questions in Macroeconomics. Students are expected to answer two questions out of four questions. Total marks for this part is 40.
<p>Recommended Readings</p> <ul style="list-style-type: none"> • Ahuja, H. L. (2019). <i>Advanced economic theory</i>. New Delhi: S. Chand Publishing. • Ahuja, H. L. Course Title	Business English II			
Course Code	BBAD 12062			
Credit Value	2			
Status	Level 1 / Semester II /Compulsory			
UTEL Benchmark	5			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	30	15	-	55
Aim				
The aim of the course is to improve Business English language skills by developing vocabulary.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> - Identify main and specific information in various reading selections related to business fields adopting Before-During-After reading strategies. - Demonstrate a significant enrichment of business and job-specific vocabulary - Analyze details in job descriptions and advertisements - Develop application procedure and interview skills - Use strategies for active listening to respond meaningfully. - Practice listening to complex text with varied structures, conversations and news items - Answer questions in job interviews with a degree of confidence and accuracy - Engage in individual and group presentations related to various careers - Recognize and incorporate sentence variety in writing, including coordination and subordination - Demonstrate the ability to write memos, CVs, cover letters and professional profiles 				
Syllabus Content				
<p>Reading: recognizing the facts given in various types of reading passages, magazine and newspaper articles using the sub skills of reading such as skimming, scanning and comprehension, Identifying and analyzing details in job descriptions and advertisements and Using terms / expressions used frequently in job interviews, orientation programmes, workshops, conferences and seminars / webinars; Grammar: Define verbs and different verb forms, including infinitive, gerund, present participle, past participle, stative verbs, dynamic verbs, and auxiliary verbs, demonstrating the usage of the twelve tenses of English and their communicative functions, forming questions and negative statements and constructing active and passive voice sentences; Writing: Writing paragraphs related to business field and personal notes to relatives and friends. Identifying different structures of CVs and writing effective CVs and cover letters using appropriate vocabulary and grammar; Speaking: Introducing oneself and others, asking for information, giving information, inviting and thanking. Conducting a SWOT analysis on oneself, constructing questions on both 'Yes / No type' and 'Wh'-question forms and formulating appropriate responses for questions - Mock Interviews; Listening: Identifying the overall and internal organization of business related audio or video records and answering the questions.</p>				
Teaching and Learning Methods/Activities	Lectures, Group discussion, Task-based language learning, student centered learning and Content and Language Integrated Learning (CLIL), self-learning activities using LMS & Computer Assisted Language Learning (CALL).			
Evaluation	Formative Assessment (In-course) 30% <ul style="list-style-type: none"> - Four assessments will be conducted to evaluate each skill. - The assessment could be in any forms such as classroom

Course Title	Computer Based Information Management			
Course Code	BBAF 21043			
Credit Value	3			
Status	Level 2 / Semester I /Compulsory			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	30	30	-	90
Aim				
The aim of this course unit is to provide specialised knowledge and skills in the design and development of databases for business information systems and to develop competencies on database management systems and its applications for business.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the terms database, database management system – Describe current technology trends in the data management and business information systems – List the users in the database management system – Identify three-level ANSI-SPARC database architecture – Explain data models – Outline the relational database design concepts – Provide the fundamental elements of relational database management systems – Draw entity relationship diagrams for various business systems. – Illustrate the use of entity relationship diagrams in the business analysis report – State the importance of the normalization in database design – Discuss the update anomalies in database systems – Apply the functional dependency concept in normalization – Classify the characteristics of the three normal forms – Employ normalization process up to third normal forms in the design of a database – Write and execute queries – Develop complex queries with the use of window functions – Apply client software to manage and fill a relational database – Prepare reports and dashboards to provide access for users to business-critical information – Construct databases on server platforms 				
Syllabus Content				
<p>Database management and business information system: introduction to current trend in database and database management system(DBMS), business challenges of an enterprise, importance of the database approach, DBMS environment, different user groups of DBMS;</p> <p>Database system architecture: three-Level ANSI-SPARC architecture, database Schema, data independency;</p> <p>Database design: types of Data Models: Hierarchical Model, Network Model, Entity-Relationship Model, Relational Model, Object-Oriented Data Model and Data modelling techniques;</p> <p>Entity relationship model: elements of Entity Relationship Diagram, Identify the integrity constraints (business rules) hold for a given problem, draw an entity relationship diagram using conceptual schema;</p> <p>Normalization technique: introduction to Normalization, update anomalies, differences between Normalized and Unnormalized format of data representation, define first, second, third Normal forms. Process of Normalization for a business problem;</p> <p>Query</p>				

languages(SQL): define Structured Query Languages (SQL), Data Definition Languages (DDL), Data Manipulation Languages (DML), Data Control Languages (DCL), query languages for create, retrieve, insert, update, sort, join, delete, filtering data in a database, writing queries with join tables, sub queries, views, create forms and reports using SQL; Database for large and small business and development: data accessibility, data/database administration, data warehousing, data mining, security, data recovery, contemporary, the internet database environment, Business Intelligent system and modern IT infrastructure to database systems.	
Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, virtual learning, presentations, individual assignments, case studies, and forum.
Evaluation	<p>Formative Assessment (In-course): 40%</p> <ul style="list-style-type: none"> – At least four assessments for 40 Marks – The assessments could be in the form of classroom assignment, Lab practical, take-home assignment, quizzes, presentations, and case studies. <p>Summative Assessment: (60%)</p> <p>Written examination</p> <ul style="list-style-type: none"> – Duration of the question paper is of three hours – Students are expected to answer five questions out of seven questions that may include several parts. – Total marks of written Examination obtained out of 100 will be converted for 60%. <p>Practical Examination</p> <ul style="list-style-type: none"> – Duration of the question paper is two hours – All questions should be answered. – The total marks of practical examination obtained out of 100 will be converted for 40%. <p>*Students should attend both examinations to complete the course unit</p>

Course Title	Hotel Housekeeping			
Course Code	BBAT 32072			
Credit Value	2			
Status	Level 3 / Semester II /Elective			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	30	---		70
Aim				
The aim of the course is to provide a clear path for students to familiarize hotel housekeeping.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the concepts of hotel and hotel housekeeping – Claim an insight into the history of the hotel industry – Explain the classification of hotels based on different criteria – Distinguish different types of the hotel – Appreciate the placement of housekeeping as an important support department in the organization of the hotel department – Examine the importance of housekeeping in hotels and List the duties and responsibilities of the department – Describe the various personnel in a housekeeping department and their duties and responsibilities – List the personal attributes required in housekeeping personnel – Assess the scope of housekeeping in establishments other than hotels – Write the room report – Explain the role of the control desk in the welcoming guest 				
Syllabus Content				
<p>Hotel overview: define the concept of hotel and history of the hotel industry, types of rooms, different type of room statuses; Organization of housekeeping department: Role of the housekeeping department, layout of the housekeeping department, organizational structure of the housekeeping department; Housekeeping administrative duties: competencies of a housekeeping professional, the executive housekeeper, duties and responsibilities of the housekeeping personnel ; Introduction to Cleaning: what is cleaning, why cleaning is necessary, levels of cleaning, types of soiling (dust, grit, litter, dirt, oil, protein stains, starch, fumes and odors, mildew, tarnishing, industrial waste). Cleaning equipment: types of cleaning equipment, uses, care and storage of equipment. Cleaning agents, non-cleaning agents and protective finishes: types of cleaning agents, storage of cleaning agents, correct use and storage of chemicals. Housekeeping floor procedures: the floor pantry, preparing room report, setting maid's trolley; Guest room cleaning procedure: layout of a guest room, rules on guest floor, entering procedure, cleaning a departure/ occupied/ not ready room, giving a turndown service, a second service ; Housekeeping control desk: role of the control desk, coordination with other departments, types of registers files maintained, lost and found handling, ,: The Linen and the uniform rooms; the linen room, storage conditions, linen room equipment and accessories, types of linen, exchange linen, discard linen, hiring of linen, the uniform room.</p>				
Teaching and Learning Methods/Activities	Lectures, tutorials, group discussions, participatory learning activities, online learning activities, presentations, individual assignments, case studies, forum, field visit and debate.			

Evaluation	<p>Formative assessment (In-course): 30%</p> <ul style="list-style-type: none"> – At least three assessments for 30 Marks – The assessments could take any form such as classroom assignment, take-home assignment, quiz, presentations, case study, debate, role play. <p>Summative Assessment: 70%</p> <ul style="list-style-type: none"> – End of course written examination is of two hours duration – Question paper contains two parts: <ul style="list-style-type: none"> ○ Part I: It is compulsory. It contains 20 multiple choice questions for 20 marks ○ Part II: Students are expected to answer three questions out of five questions that may include several parts. Total marks for this part is 80.

Course Title	Proposal Development			
Course Code	BBAT 32082			
Credit Value	2			
Status	Level 3 / Semester II/ Enhancement			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	30	---	--	70
Aim				
The aim of this course unit is to provide knowledge to develop the research proposal.				
Intended Learning Outcomes				
<ul style="list-style-type: none">– Identify a problem/issue in tourism and hospitality management suitable for scientific investigation– Recognize that problem within the relevant literature and existing evidence and identify gaps in the evidence about that problem– Develop a (structured) research question and objectives which addresses a gap in the evidence about the problem– Plan an appropriate research design to investigate the research question– Explain research philosophy– Use appropriate online databases of research evidence and reference management software– Justify the methodology selection– Apply ethical principles of research to shape or modify the research proposal				
Syllabus Content				
<p>Introduction to research proposal: The nature of research proposals, the general range of skills required to develop proposals, the issue of motivation and its influence on research choices, information on funders’ requirements, ways of selecting potential supervisory support, the purpose of a research proposal, general requirements of reviewers; The key aspects of proposal preparation: the key orientating concepts of proposals; the content and form of the title, abstract, and supporting documents; describing the conceptual framework and producing a sound argument; Writing introduction, rationale and literature review: Details of the requirements of different forms of literature review, searching the literature; developing own argument; Discussing aim, objectives, research questions/hypotheses: Maintaining consistency across purpose, design and implementation, the depth of methodology description required in different circumstances, the salience of using the right language, the importance of ethical considerations, research direction; Financial consideration, research planning and collaboration: the ground rules of budgeting for any research project, the planning of goals and establishment of deadlines, managing time on a project effectively.</p>				
Teaching and Learning Methods/Activities	Lectures, guest lectures, tutorials, group discussions, individual assignments, case studies.			
Evaluation	Summative Assessment: 100% <ul style="list-style-type: none">- Proposal submission – 70 Marks (End of the semester)- Presentation – 30 Marks (the last day of the examination)

Course Title	Food Safety and Hygiene			
Course Code	BBAT 41043			
Credit Value	3			
Status	Level 4 / Semester I/Core			
Notional hours	Theory	Practical	Field/industrial visits	Independent learning hours
	45	30		75
Aim				
The aim of this course unit is to provide the students sound knowledge and practical exposure about food, personal and institutional hygiene issues, and hygienic practices in the hospitality sector to assure the food safety.				
Intended Learning Outcomes				
<ul style="list-style-type: none"> – Define the terms of food hygiene, food safety, food microbiology, food poisoning, and food-borne illnesses – Describe the background and historical significance of food hygiene and safety – Describe different food poisoning microorganisms associated with food and their growth requirements – Recognize biological, chemical and physical and hazards present in a food preparation process – Point out the biological and non- biological causes of food poisoning – Explain the concept of food contamination and give examples of common food contaminants – Identify and explain food quality, personal hygiene and food safety practices in a tourist hotel – Describe appropriate personal hygienic practices to prevent the food borne-illnesses – State different types of natural toxicants, food allergies and intolerance – Identify appropriate practices for safe food handling, storage methods and conditions for different foods and raw materials – Identify appropriate practices for the preparation and serving of foods safely – Recognize appropriate designs of food establishments – Identify the importance of cleaning, sanitizing and waste management practices in a food establishment – Practice the food safety management systems in a tourist hotel 				
Syllabus Content				
<p>Introduction to food hygiene and safety: Definitions, background and historical significance, Issues, Scientific basis and implication, Regulatory, industrial and international implications, Importance of food hygiene; The principles of food safety and hygiene: Food microbiology (Types and characteristics of microorganisms, Their growth requirements, Common spoilage microorganisms and pathogens in food, Use of extrinsic and intrinsic factors to control microbial growth), Hazards in foods (Types of hazards: Biological, Chemical and Physical. Sources, Health effects, Controlling and prevention of those hazards), Food spoilage and poisoning (Types, Potential of microbes to create problems, Symptoms, Contamination and cross contamination), Maintain of good personal hygiene; (Personal care; maintaining of body, grooming and maintaining of good health, Importance of monitoring and training on personal hygiene); Natural toxicants in foods: (Types of natural toxicants: Plant origin, Animal origin and Microbial based. Sources, Health effects and detoxification / prevention), Food allergies and intolerance: (Types of foods, Causes and Health effects); Practical aspects of food safety and hygiene: Principles and applications of safe food handling and storage; (Purchasing, Quality inspections, Safe food handling techniques, Types of food stores and safe storing of different foods and raw materials), Preparation of foods in safely; (Sorting, Cleaning, Peeling, Cutting and cooking), Serving food safely to clients; (Safe and hygienic delivering of food to</p>				

<p>serving areas, Handling and serving of food safely, Cleaning procedures of before, during and after the service), Cleaning and sanitizing tasks of food establishments; (Types of cleaning and sanitizing agents, Usage and management of them, Procedures of cleaning of different areas of a food establishment), Control of pests in a food establishment– (Types of pests, Damages of pests and Controlling of pest), Appropriate designs of food establishments; (Types of layouts, Importance, Planning) Waste management in a food establishment; (Types of wastes: Solid waste, Liquid waste, Waste water. Techniques for waste management: Reduce, Reuse and Recycle principles); Food safety regulations and standards: Laws concerning food hygiene and safety, Food quality standards: (GMP, GHP, Global GAP, Codex standards, SLS standards, Food Act in Sri Lanka), Food safety management systems: (HACCP, ISO 22000, FSSC 22000, SQF and Organic certification), Training of employees in food safety aspects: (Training needs and procedures).</p>
